Introduction to Leawo Blu-ray Recorder Ripper

Have recorded Blu-ray disc collections and would like to convert BDAV discs to MP4, MKV or other video files? Have no idea how to convert BDAV to MP4 or MKV files? Leawo Blu-ray Recorder Ripper is here to help.

Specifically designed for ripping BDAV files, Leawo Blu-ray Recorder Ripper could help rip and convert BDAV disc, folder and/or ISO image files to video/audio files in 180+ formats like MP4, MKV, AVI, FLV, WMV, MP3, AAC, etc. Play and watch BDAV files on any media player or device at will.

Main features of Leawo Blu-ray Recorder Ripper:

- Decrypt, rip and convert BDAV to MP4, MKV, FLV, WMV, AVI, and other video files.
- Extract audio off BDAV to MP3, AAC, OGG and other audio files.
- Convert BDAV to video/audio files for various media players and devices such as iOS devices, Android smartphones and tablets, Microsoft devices, and others.
- Convert BDAV files with selected audio tracks and subtitles.
- Convert BDAV files to up to 1080P videos, multi-track quality lossless MKV/MP4, etc.
- Get rid of disc protection and region restriction.
- Customize output video and audio parameters like video codec, bit rate, aspect ratio, frame rate, audio codec, audio bit rate, channel, etc.
- Built-in video editor to trim video length, crop video size, adjust video effect, apply watermark, add 3D effect, rotate video, etc.
- Merge several BDAV files into one file.

How to Purchase and Activate Leawo Blu-ray Recorder Ripper

Leawo Blu-ray Recorder Ripper is available in both free trial version and registered version. Both versions could convert BDAV to MP4, MKV or other video/audio files. There are 2 differences between these 2 versions:

- Free trial version is valid for 30 days only, during which encrypted BDAV disc, folder and ISO files could be loaded and handled. When the free trial version expires, encrypted BDAV files won't be loaded, and only non-encrypted BDAV files could be loaded and handled.
- Free trial version only handles the first 5-minute content of source BDAV files. That means only the first 5-minute content of source BDAV files will be outputted.

To remove the limitations of free trial version, customers have to purchase license code of Leawo Blu-ray Recorder Ripper, and activate this module.

How to purchase license of Leawo Blu-ray Recorder Ripper

To enjoy the full features of Leawo Blu-ray Recorder Ripper, you have to register it first. Before you could register and activate Leawo Blu-ray Recorder Ripper, you need to purchase a license code. The license code includes 2 types: 1-year license and lifetime license. Follow the below ways to purchase Leawo Blu-ray Recorder Ripper license:

- Directly visit <u>Leawo Blu-ray Recorder Ripper page</u> and click the "Buy Now" button. And then, on the purchase page, choose either 1-Year or Lifetime type of license before clicking the "Check Out Now" button. On the order page, input billing information and then payment information to complete the purchase. Once the purchase is complete, purchased license code will be sent to you via your registered email in no time.
- On Leawo Prof. Media program interface, click the "Activation center" icon to call out the "Activation Center" interface, where you could see Blu-ray Recorder Ripper module. Click the "Purchase" button to open the Leawo Blu-ray Recorder Ripper purchase page and purchase license of Leawo Blu-ray Recorder Ripper. If you have already activated any module of Leawo Prof. Media, you then click the "Renew" button next to Blu-ray Recorder Ripper module to purchase license code.

How to rip and convert BDAV to video/audio files

Leawo Blu-ray Recorder Ripper could help you decrypt, rip and convert BDAV files to MP4/MKV/AVI/WMV.. files for playback on various media players and devices, no matter BDAV files are encrypted or not. Check the below guide to learn how to rip and convert BDAV to video/audio files.

Step 1: Enter Leawo Blu-ray Recorder Ripper module

To rip and convert BDAV files, you need to get the below things well prepared:

- Readable Blu-ray drive connected to your computer if you want to rip and convert BDAV disc.
- Source BDAV disc, folder or ISO image file.
- Computer with Internet connection.
- Computer hard drive with enough space.
- Download and install Leawo Blu-ray Recorder Ripper on your computer.

Note: Leawo Blu-ray Recorder Ripper is a module built in Leawo Prof. Media.

				•	You Cabo					

After installing Leawo Prof. Media on your computer, kick it off. Click the "Convert" tab on the top or "Blu-ray Recorder Ripper" option in the middle to enter the Blu-ray Recorder Ripper module.

Step 2: Add source BDAV files

On the "Convert" tab, click the "Add UHD/Blu-ray/DVD" drop-down button and then click "Add from CD-ROM", "Add from folder" or "Add iso file" option according to your needs.

Once you have added source BDAV file, there will list 3 different content loading modes: Full Movie, Main Movie and Custom Mode.

- Full Movie: Load entire source BDAV file for converting.
- Main Movie: Load the main movie (the longest title) by default, but allows manual changing.
- Custom Mode: All you to load selected title(s) for converting.

Choose the right mode and then add the titles you want to convert from source BDAV file.

After loading source BDAV file, you could select subtitles and audio tracks for each loaded title, view detailed information, change title order, merge all loaded files into one by clicking the

Step 3: Set output format

Now you need to set output format. After loading source BDAV files, click the "Output Profile: MP4 Video" drop-down button and then choose "Change" option to enter the "Profile" panel, where you could select output format. By clicking the "Edit" option, you could enter the "Profile Settings" panel to adjust output video and audio parameters.

On the "Profile" panel, you could set output format from either "Format" or "Device" tab, and add output profile to "Favorite" tab, and add customized profile into "Custom" tab.

There are hundreds of formats for you to choose as output format, ranging from regular video/audio formats to up to 4K and lossless video formats. Just choose one according to your needs.

								li li

As mentioned above, you could adjust output video and audio parameters on the "Profile Settings" panel, including video codec, bit rate, resolution, frame rate, aspect ratio, audio codec, audio bit rate, sample rate, and channel. You could even save the customized profile into "Custom" tab for future use.

Step 4: Set output directory

After setting output format, return to the "Convert" tab and then click the green "Convert" button. Then, on the popup sidebar, set output directory in the "Save to" box. You could change and open target folder here.

Note: If you haven't activated Leawo Blu-ray Recorder Ripper module, there will be a "Notice"

showing you the limitation of free trial version of Leawo Blu-ray Recorder Ripper module. You could purchase and activate it, or take a try of the free trial version by clicking "Agree" option.

Step 5: Start converting BDAV files

Finally, click the "Convert" button at the bottom of the sidebar to start ripping and converting BDAV file to MP4, MK, FLV, WMV, AVI or other video/audio files. Then you will see the converting panel, which showcases you the detailed converting progress. You could cancel/stop converting BDAV files anytime you like, and set after-done operation at the bottom right corner.

How to edit BDAV files before converting

Leawo Blu-ray Recorder Ripper comes with a BDAV editor that could edit BDAV files in multiple ways, including: adjust video/audio playback speed, rotate video, remove noise, trim video length, add watermark, crop video size, adjust video effect, apply 3D movie effect, etc. To edit BDAV file,

click the edit icon

to enter the editing panel.

On the editing panel, you will get instant preview of any move you have made here. The detailed operation and usage of these editing features are listed below:

Video & Audio

On the "Video & Audio" tab, you could adjust the playback speed from 1/4X to 4X, change the Volume Zoom, and rotate video for special angle of view.

Trim

On the "Trim" tab, you could trim video length to remove unwanted clips for converting. There are 3 ways for you to trim video length:

- Set the "Start Time" and "End Time" to trim video length precisely.
- Directly drag the beginning and ending points on the playback bar.

Watermark

On the "Watermark" tab, slide the "Watermark" option to green and then choose to add either Text or Image watermark. You could set the watermark transparency, size, position, color, font, etc. You could even apply this watermark to all.

Crop

On the "Crop" tab, you could crop video size to remove black margin. You could crop video size in multiple ways:

- Choose a Zoom type to directly crop video size.
- Directly drag the dot frame on the left window and adjust its size.
- Set "Left" and "Top" volumes.

Effect

On the "Effect" tab, you could adjust video brightness, saturation, and contrast.

3D

On the "3D" tab, you could apply 3D effect for converting 2D BDAV file to 3D MP4/MKV/FLV/WMV/.... You need to firstly slide "3D Mode" box to green and then choose 3D movie effect. There are 6 different 3D movie effects available for you to choose: Red/Cyan, Red/Green, Red/Blue, Blue/Yellow, Interleaved, and Side by Side. 3D Depth could also be adjusted. You could get instant preview here.
