## Brief Introduction

If you need a free streaming video recorder to record online videos from various sites like Amazon, Netflix, Hulu, HBO Max/Max, Disney+, YouTube, Facebook, etc., CleverGet Recorder is your best choice. It is a free stream recorder to record online videos for free from various streaming services. This free streaming video recorder could record nearly all playable videos at up to 4K resolution and 60FPS, and then save online videos to MP4/MKV files for unlimited offline watching on various media players and devices. It could record on-demand videos, live streaming videos, and even capture DRM streaming videos.

### Main features of CleverGet Recorder:

1. Record online videos in original quality or custom quality like 4K/2K/1080/720P resolution and 60fps.
2. Record online videos without any limitation at normal playback speed.
3. Record video at higher recording speed like 2X, 3X, 4X or 5X to record videos that are shorter than 3 minutes.
4. Record online videos and save recording as MP4/MKV files for unlimited offline playback on various MP4/MKV compatible devices on the go.
5. Customize ad filter to record online videos with ads and commercials skipped.
6. Capture DRM streaming video from various streaming sites like Amazon, Netflix, Disney+, Hulu, Max, and others.
7. Record online videos with selected audio track.
8. Stop and save recording anytime, and then restart recording at will.
9. Built-in browser to play, watch and record online videos directly.

## Differences between CleverGet Recorder and CleverGet Video Recorder

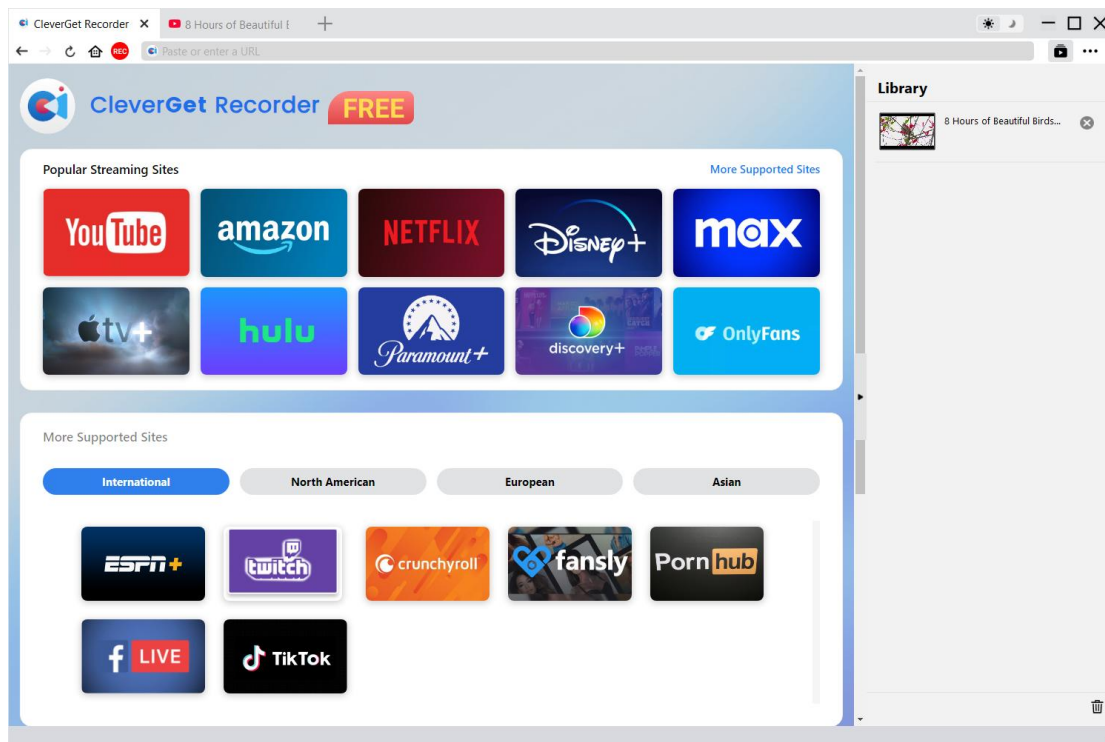

CleverGet Recorder is the free version of CleverGet Video Recorder. These 2 streaming video recorders share all the same features but have differences in recording length and recording speed. Installation	Standalone installation	Bundled into CleverGet installation
Cost	Free of charge	\$59.95 for 1-year license, \$99.95 for lifetime license

## How to Record Online Videos for Free with CleverGet Recorder?

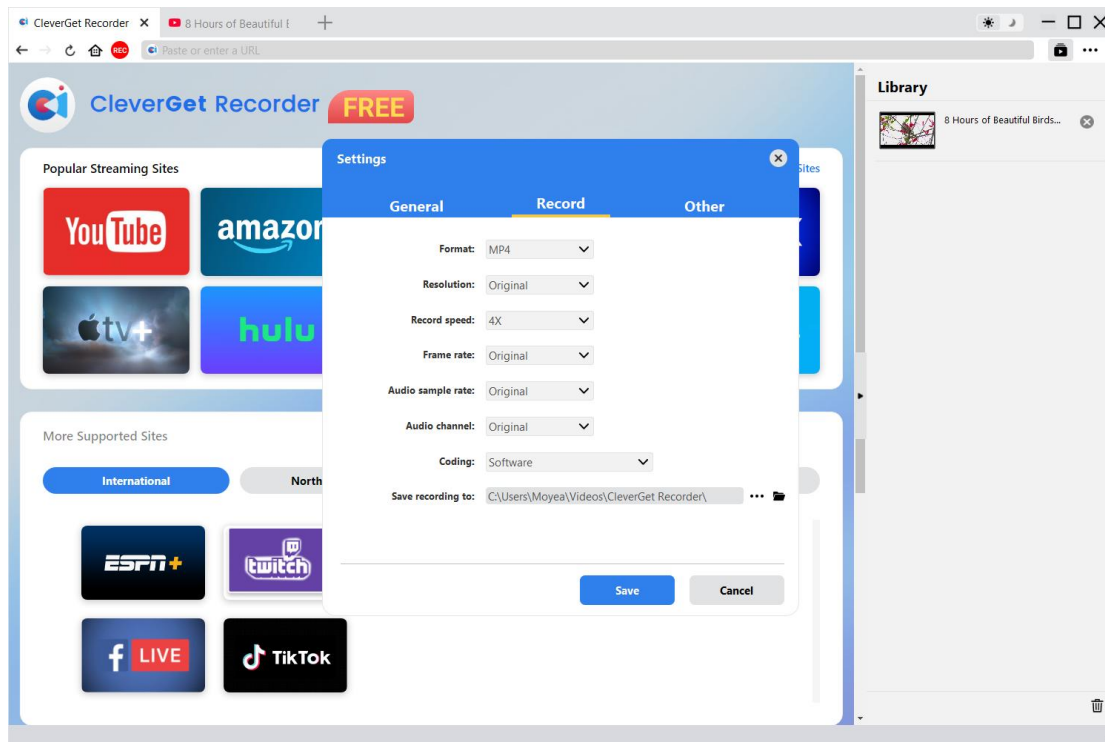

CleverGet Recorder offers totally free solution to let you record online videos to MP4/MKV files in original/4K/2K/1080P/720P quality from 1000+ video sharing sites for totally free. It even comes with an ad filter feature to let you record online videos with ads skipped. The below steps show how to use CleverGet Recorder to record online video for free.

### Step 1: Download and Install CleverGet Recorder

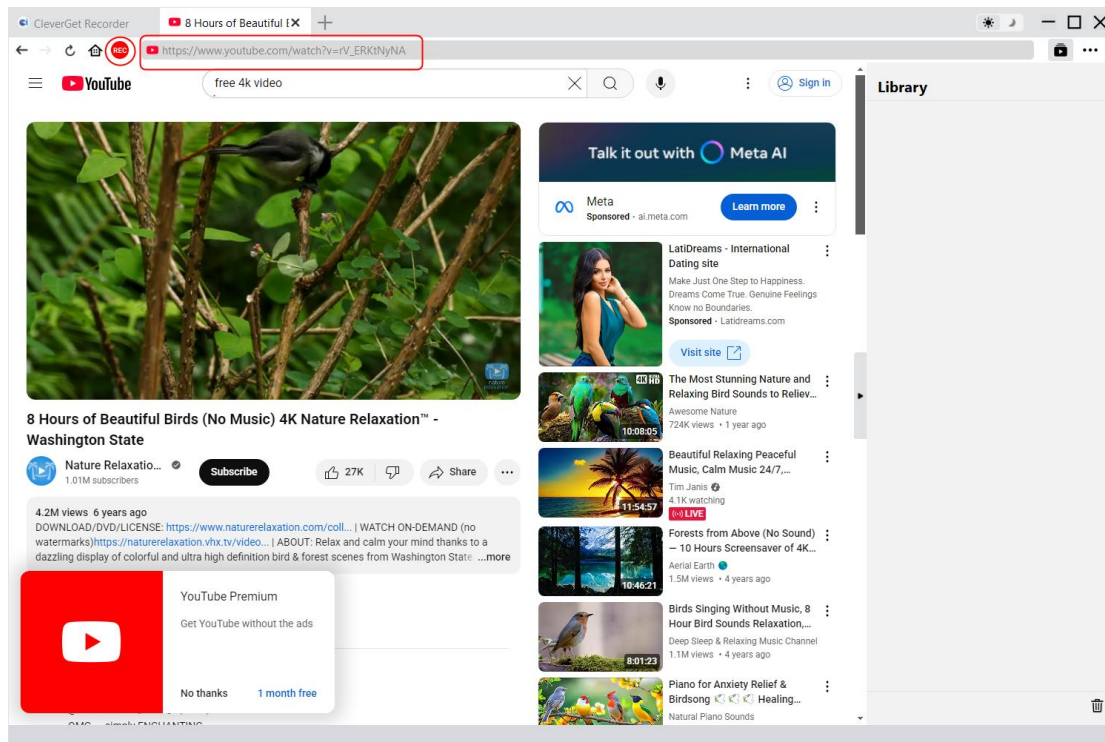

Firstly, free download and install CleverGet Recorder on your computer. It could run on Windows 7/8/10/11 and mac OS 10.15 and later. Check the tech specs for the detailed system requirements for installing CleverGet Recorder on your computer.

## Step 2: Set Recording Preferences

After installing CleverGet Recorder on your computer, kick it off. On the top-right corner, click the More option (in 3-dot icon **...**) to choose “Settings” option on the drop-down menu. On the pop-up “Settings” panel, open the “Record” tab to specify recording settings, including: “Format”, “Resolution”, “Record speed”, “Frame rate”, “Audio sample rate”, “Audio channel”, “Coding”, and “Save recording to” options. Click “Save” button to save all settings and quit the “Settings” panel.

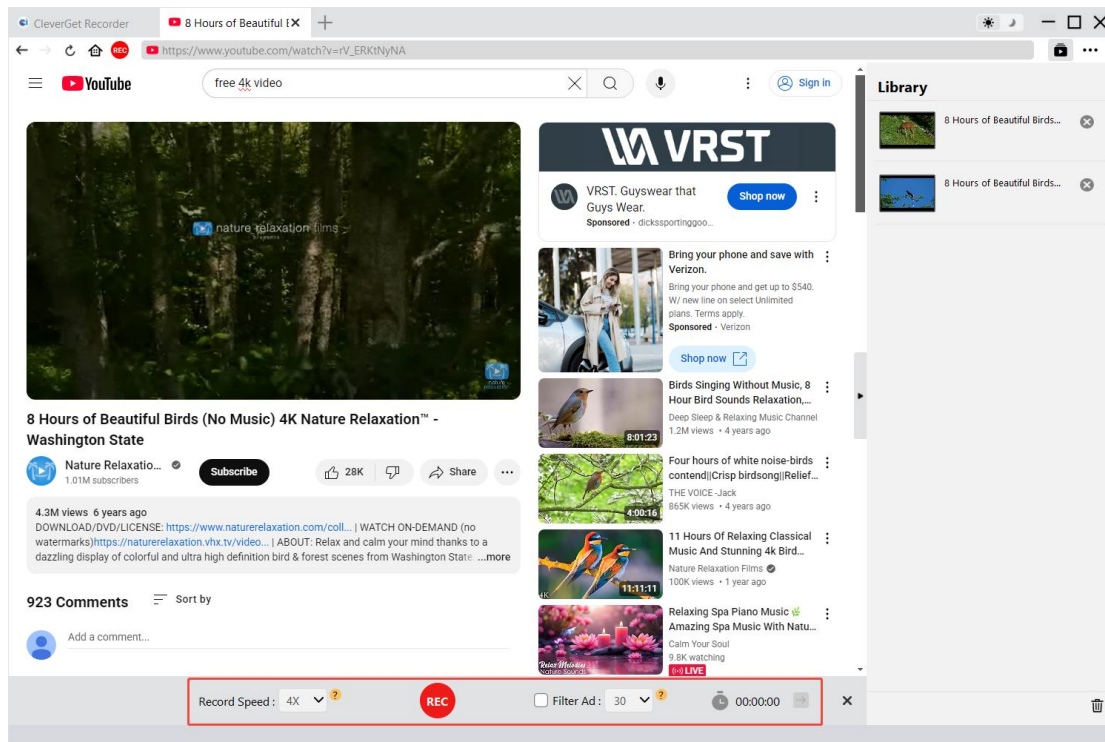

## Step 3: Play Back Target Video

Open the target video streaming website within CleverGet Recorder, and then browse, search and play back the target video you want to record. Click the red REC icon  right next to the Home icon on the address bar to invoke the “Recording” toolbar at the bottom.

## Step 4: Adjust Recording Settings on Toolbar

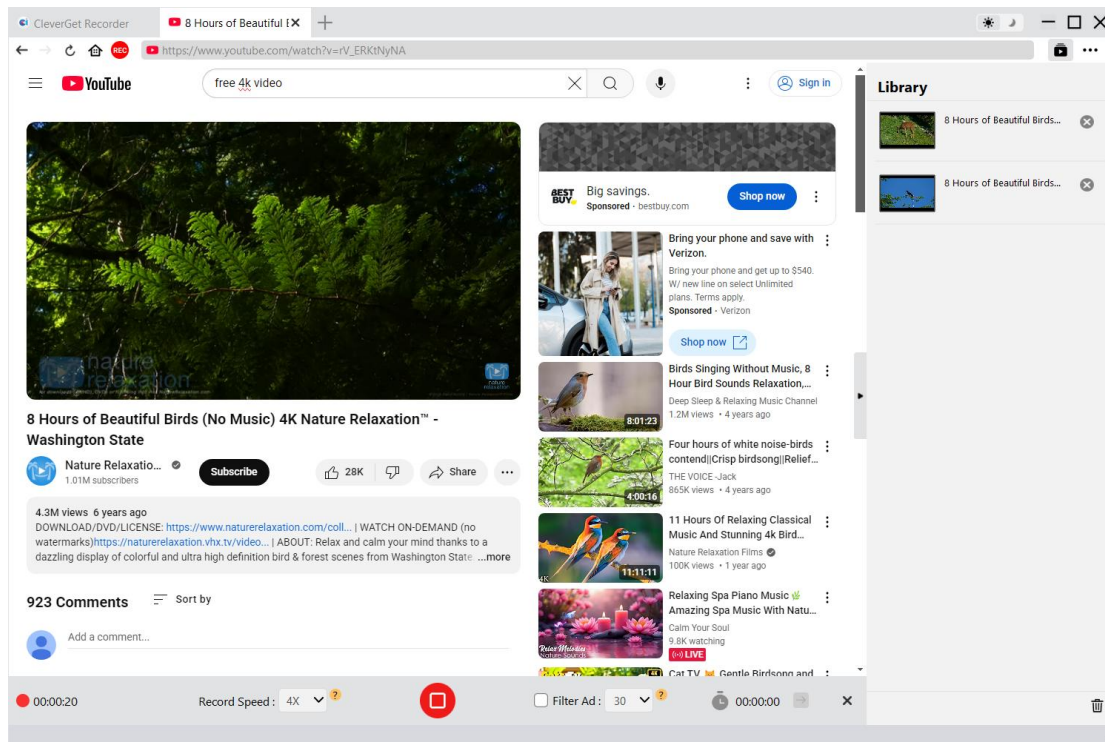

The recording toolbar at the bottom will show up and let you adjust recording speed, ad filter and recording scheduler.

### Notes:

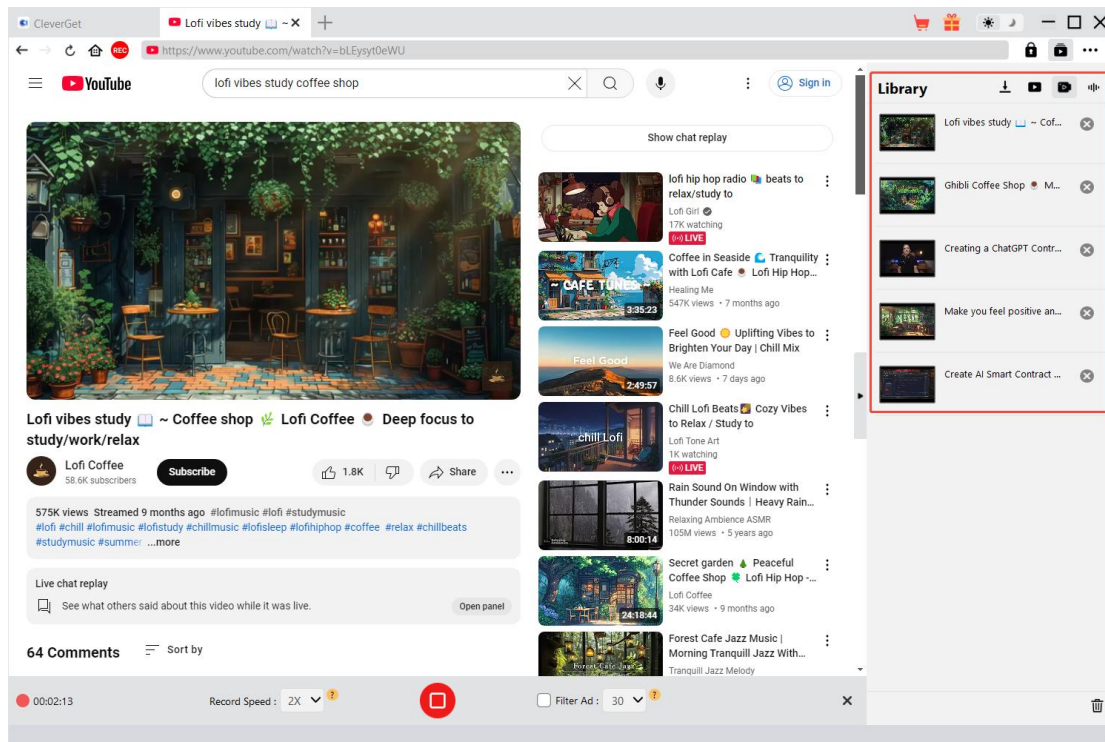

1. Any change in "Recording Speed" during recording will take effect instantly.
2. Any change in "Filter Ad" option and ad filter length will take effect since the next ad playback during recording.
3. The higher recording speed you set, the bigger odd target video playback will become choppy. Choppy video playback doesn't affect the recording.
4. For stable recording quality, please don't set the video playback quality as "Auto". Set a specific video playback quality if available, and set audio track before recording.
5. The "Filter Ad" feature is a beta feature, which might not apply to certain streaming services. If it is not checked, CleverGet will record target video with ads.
6. The "Auto end in" feature(recording scheduler) allows you to set recording length and will take effect once you click the arrow icon. CleverGet Recorder will automatically stop and save recording once it reaches the length you have set.

## Step 5: Start Recording

Afterwards, drag the playback bar to the point as recording start point and then click the red REC button  to start recording online video.

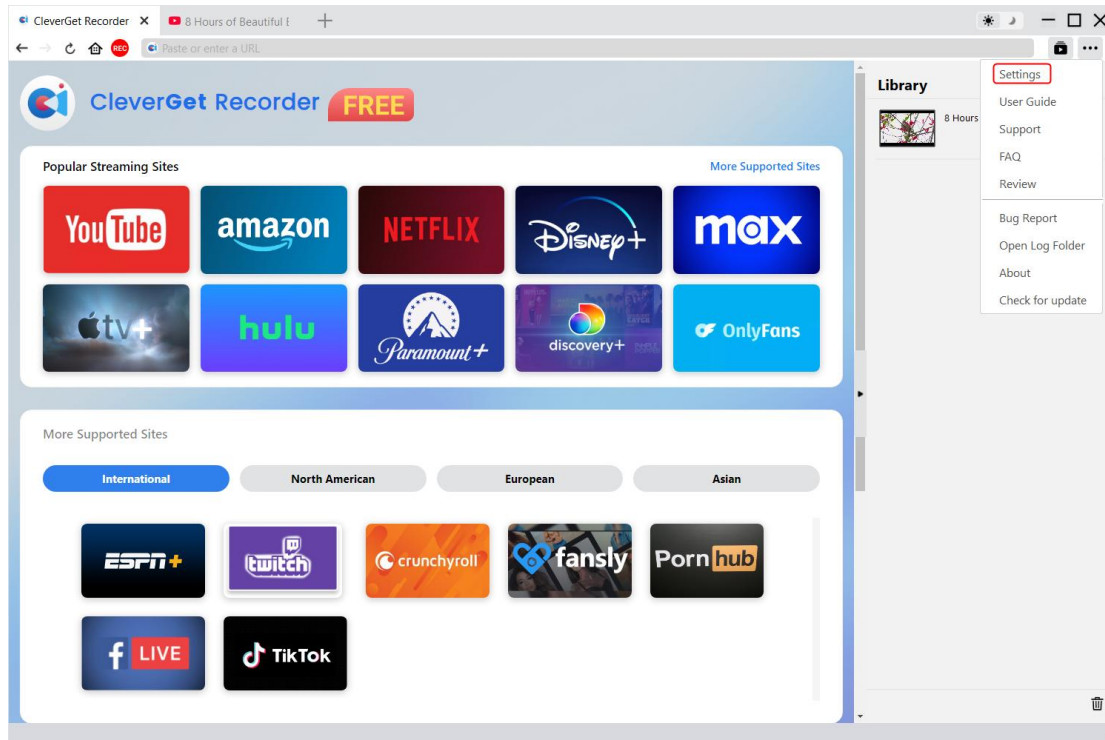

## Step 6: Check Recordings

You could view entire recording process on the recording toolbar, stop recording and then restart recording any time you like. CleverGet Recorder will generate a recording file every time you stop the recording. All recordings are available on the right sidebar, which could be opened/hidden by clicking the “Library” icon  at the top-right corner. Here, you could click “Play” button on the thumbnail of recording file to play it back with your default media player, open its file folder, play it with [Leawo Blu-ray Player](#), burn to Blu-ray/DVD, delete it, or open web page of recorded video.

## How to Set CleverGet Recorder

Click the three-dot icon  on the top-right corner to call out the drop-down menu, which includes multiple options: Settings, User Guide, Support, FAQ, Review, Bug Report, Open Log Folder, About and Check for update. Click any option to get help you need.

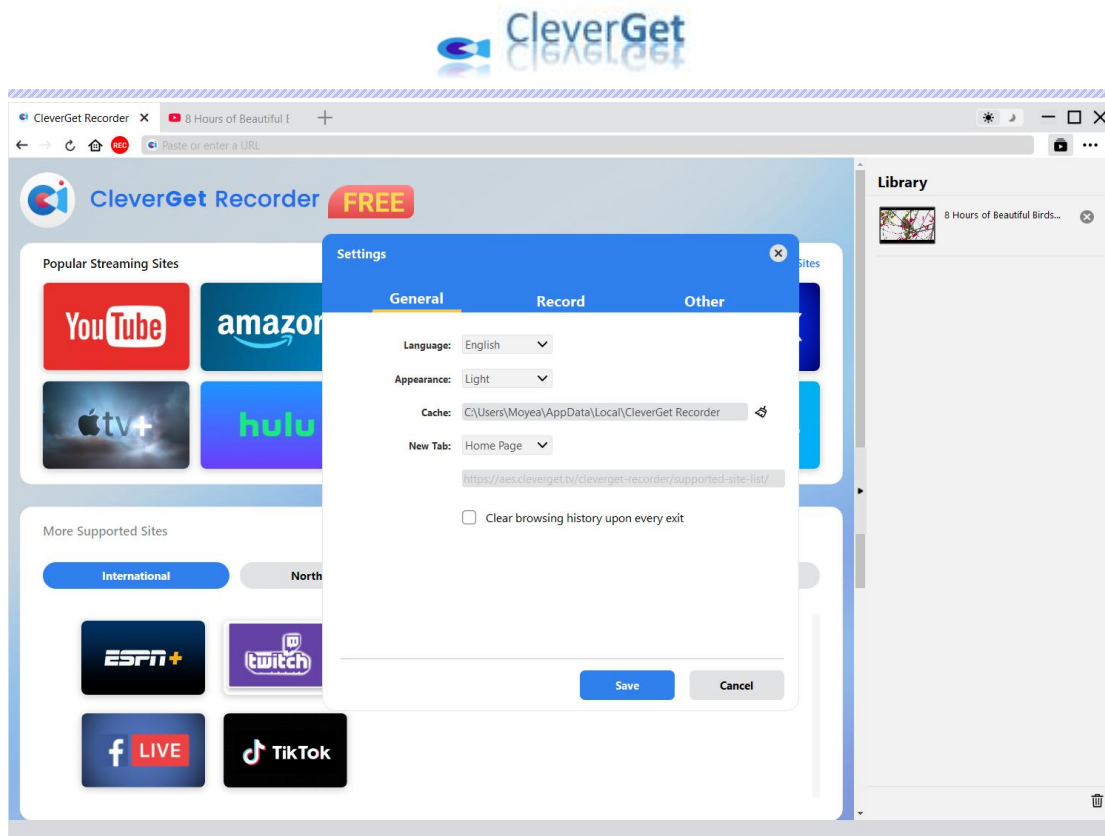

Click the “Settings” option on the drop-down menu to enter “Settings” panel.

## General Tab

On the “General” tab, you could set program UI language, appearance, max download tasks, download directories, etc. Check the details below:

1. **Language:** Choose a UI language from English, Chinese (Simplified), Japanese, German, Korean and French.
2. **Appearance:** Switch between light and dark modes. Or, change it directly by clicking “Light/Dark Mode” icon  on the main interface.
3. **Cache:** View program browser cache address, and clear cache in one click for quick issue fixing like program crash, program getting stuck, etc.
4. **New Tab:** Choose to open a new tab to home page, default page or blank page.
5. **Clear browsing history upon every exit:** Check to let clear browsing history every time CleverGet Recorder quits.

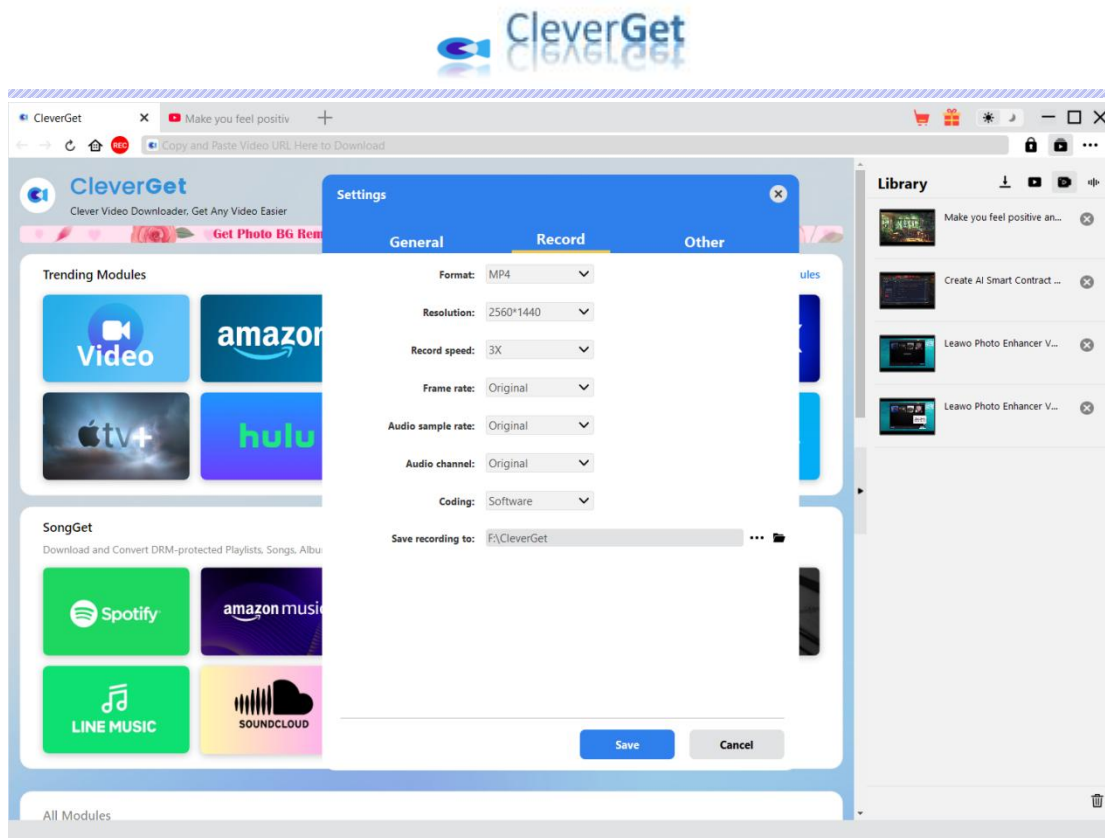

## Record

On the “Record” panel, you could set anything related recording, including:

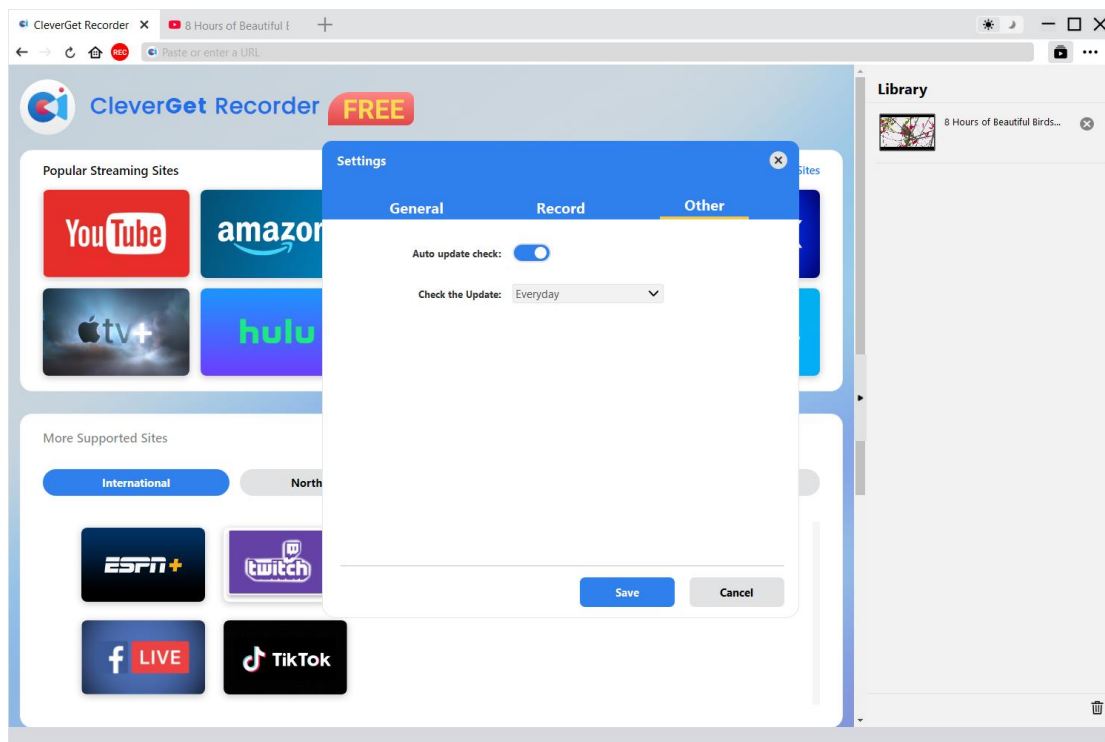

1. **Format:** Choose to save recordings to MP4 or MKV file.
2. **Resolution:** Set the default recording resolution, up to 4K available.
3. **Record speed:** Choose the default record speed from 1X, 2X, 3X, 4X and 5X.
4. **Frame Rate:** Choose the default frame rate for recording online video. Original is set by default and recommended.
5. **Audio sample rate:** Choose the default audio sample rate for recording online video. Original is recommended.
6. **Audio channel:** Set the default audio channel for recording online video. Original is recommended.
7. **Coding:** Choose to encode recordings through Software accelerated coding (CPU coding) or hardware accelerated coding (GPU coding, if available).
8. **Save recording to:** View and change recording save path.

## Other Tab

Open Other tab to enable/disable “Automatic Update” feature and set update check frequency on “Check the Update” drop-down panel.

After all settings are finished, remember to click “Save” button to save all changes.
