Main features of Leawo UHD Creator:

- Burn 4K Blu-ray disc, folder and/or ISO image file from video files in 180+ formats.
- Burn 4K Blu-ray disc, folder and/ISO image file from image files in JPG, JPEG, PNG, and BMP.
- Add disc menu from preset templates for burning 4K Blu-ray files.
- Design disc menu according to personal preference for 4K Blu-ray burning.
- Edit loaded videos like trimming video length and adding chapter for 4K Blu-ray burning.
- Load photos and automatically generate photos into slideshow.
- Edit generated photo slideshow video and audio, like adjust photo position, insert transition effect, add background music, etc.
- Handle video to 4K Blu-ray burning at up to 20X higher speed upon GPU acceleration.

## How to Purchase and Register Leawo UHD Creator

Leawo UHD Creator is a module packed in Leawo Prof. Media. Similar to other modules, Leawo UHD Creator also provides both free trial version and registered version. Within the free trial period, you could freely convert and burn the first 5-minute content of source video/image files to 4K Blu-ray file, while the registered version has no limit.

To unblock the limitations of free trial version of Leawo UHD Creator, you need to get the registered version. The registered version requires purchasing license code. The below content describes how to purchase and activate license of Leawo UHD Creator in detail.

#### How to purchase license of Leawo UHD Creator

Leawo UHD Creator provides 2 types of license: 1-year license and lifetime license, which differ each other in validity period only. You could purchase Leawo UHD Creator from both Leawo UHD Creator website page and Leawo Prof. Media program:

- On Leawo UHD Creator page: Click the "Buy Now" button and then on the following popup purchase page choose either 1-Year or Lifetime type of license before clicking the "Check Out Now" button. On the order page, complete the billing information and payment information to proceed the purchase. Once the purchase is complete, purchased license code will be sent to you via your registered email in no time.
- On Leawo Prof. Media program interface: Click the "Activation center" icon to call out the "Activation Center" interface, where you could see UHD Creator module. Click the "Purchase" button next to the UHD Creator module to open the Leawo UHD Creator purchase page and purchase license of Leawo UHD Creator. If you have already activated any module of Leawo Prof. Media, you then click the "Renew" button next to UHD Creator module to purchase license code.

# How to Use Leawo UHD Creator - Burn Video to 4K Blu-ray

Leawo UHD Creator is the best 4K Blu-ray creator software tool for you to convert and burn videos to 4K Blu-ray disc, folder and/or ISO image file, as well as burn photos to 4K Blu-ray slideshow. The below guide would show you how to burn 4K Blu-ray from video/image files with Leawo UHD Creator in detail.

To get started, you need to get the below things well prepared:

- Blank writable 4K Blu-ray disc if you want to burn 4K Blu-ray disc from video.
- Source video files for burning 4K Blu-ray in compatible format.
- Enough hard drive space for burning 4K Blu-ray folder/ISO image file.
- Internet connection.

You also need to download and install <u>Leawo Prof. Media</u> on your computer, since Leawo UHD Creator is a module packed in Leawo Prof. Media.

#### **Step 1: Add source video files or folder**

Kick off Leawo Prof. Media. Click either "Burn" button on the menu bar or "UHD Creator" option in the middle to enter the UHD Creator module.

On the "Burn" module, click the "Add Video" drop-down button and then choose "Add Video", "Add Video Folder", or "Add iso file" option to load corresponding source files.

📕 Leawo Prof. Media 12					🗟 🖵 🔎	* 0 _ 🗆 ×			
Home Conv	vert Burn	Сору	Download Cina	× Ivia	Prof. Media				
Add Video	Add Photo		Template: N	No Menu		Burn 🔡			
4K	(Las Vegas Output Length: 00:02:12	: Size: 617.86 MB	Unknown ogg V		Built-in No Menu	Online Custom			
DVD-5 DVD-5 DVD-9 BD-25 1280X720 BD-50 1280X720 BD-50 1280X720 BD-50 1280X720 BD-50 1280X720 BD-50 3840X2160 BD-66 3840X2160 BD-66 3840X2160					Standard Business				
BD-25 3840X2160	Fit to disc 🗸	16:9 🗸		556.86 MB/23.28 GB		_			

After loading video files, you could play back loaded video files, directly drag and drop video for adjusting order, view video info, rename output file, select audio tracks, etc.

**Note**: To burn 4K Blu-ray, at the bottom let corner, click the first drop-down button and then choose one from BD-25 3840X2160, BD-50 3840X2160, BD-66 3840X2160 and BD-100 3840X2160 option according to the 4K Blu-ray disc type you want to create. And then set the "Fit

to disc" and aspect ratio here. You could view required space at the bottom as well.

## Step 2: Add disc menu (optional)

On the right sidebar, you could choose a disc menu template to add disc menu for output 4K Blu-ray file. There are quite a few themes available under the "Built-in" tab: Standard, Business, Childhood, Education, Holiday, Nature, Sports, and Wedding. You could also download more templates from the "Online" tab, and choose one from the "Custom" tab. The "Custom" tab groups all disc menu templates you have designed by yourself. Choose one template and then click the middle of the theme to get instant preview of selected disc menu template. If you don't want a disc menu, just check the "No Menu" option in the top of the "Built-in" tab.

On the preview panel, you could click the "Play" button to play back loaded videos, or click "Scene" option to view the chapter list.

By clicking the pencil icon, you could enter the disc menu designer page to design disc menu according your own will, like change title, adjust text font/size/color, add background image/video/music, change the chapter list order, etc. After settings these, you could click the "Save template" button to save designed disc menu as a new template to "Custom" tab for future use.

📕 Leawo Prof. Media 12						P * 0	) _ <b>D</b> ×

I REAL DAY		ок	Cancel		Sports					
			716.92 MB/23.2	8 GB						

Step 3: Edit source video files

After adding disc menu, you return to the "Burn" module page and then you could see an edit icon ( icon ( icon ) right in every loaded video title, by clicking which you could enter the editing panel, where you could trim video length and add chapters.

#### Trim video length

On the "Trim" tab, you could trim video length to remove unwanted clips for converting. There are 3 ways for you to trim video length:

- Set the "Start Time" and "End Time" to trim video length precisely.
- Directly drag the beginning and ending points on the playback bar.
- During playback, click the "Set as start time" button in and "Set as end time"

#### **Create Chapter**

On the "Create Chapter" tab, you could choose to insert chapter automatically or manually.

- Create chapters automatically: You could either set chapters you want to create or each chapter length in the "Auto Insert Chapter" section, and then click the "Auto Insert Chapter" button to create chapters automatically.
- Create chapters manually: To create chapters manually, you could manually click "Insert chapter" button at any point you want to insert the chapter.

After you have trimmed video length and created chapters, click the "OK" button to save all changes and return to the "Burn" tab main interface.

#### Step 4: More 4K Blu-ray burning settings

On the "Burn" interface, click the big green "Burn" button for more 4K Blu-ray burning settings. There will pop up a sidebar on the right, which includes settings of "Burn to", "Disc Label" and "Save to".

- **Burn to**: Decide what 4K Blu-ray file type you want to create, Folder, ISO Image File, and/or 4K Blu-ray disc. This setting allows multiple choices. If you want to create 4K Blu-ray disc, make sure you have inserted a writable 4K Blu-ray disc into the UHD drive that's connected to your computer.
- **Disc Label**: Give the output 4K Blu-ray file a name.
- Save to: Set a hard drive to handle the 4K Blu-ray burning and save the output 4K Blu-ray file. Make sure you have chosen a hard drive that has enough space. You could view required space here.

Right next to the folder icon O, you could see a clickable drop-down button, which lets you decide how many 4K Blu-ray disc copies you want to create. This is available only when you have chosen to create 4K Blu-ray disc option under the "Burn to" section.

#### Step 5: Start burning 4K Blu-ray

📕 Leawo Prof. Media	12	፟፟፟፟

	Total			0%		Remaining time: 01:11:17				
						Cancel				

Finally, click the "Burn" button at the bottom of the sidebar to start burning videos to 4K Blu-ray within Leawo UHD Creator. On the "Burning" interface, you could view the entire burning process and set after-done operation at the bottom right corner.

# How to Use Leawo UHD Creator - Burn Photo to 4K Blu-ray

With Leawo UHD Creator, you could also burn photos to 4K Blu-ray photo slideshow in disc, folder and/or ISO image file. Make sure your photos are saved in JPG, JPEG, PNG, or BMP format. Leawo UHD Creator will automatically generate photos into photo slideshow and then let you burn generated photo slideshow to 4K Blu-ray file easily.

#### Step 1: Add source photo files or folder

On "Burn" module, click the "Add Photo" button. You then will be able to add either photo files or photo folder.

📕 Leawo Prof. Medi	ia 12	🕺 🖵 🔎	* 0 _	□ ×							
Home	Conver	nvert Burn Copy Download Cinavia					Prof. Media

BD-25 3840X2160 BD-50 3840X2160 BD-66 3840X2160 BD-100 3840X2160							Business				
BD-25 3840X2160	<b>_</b>	Fit to disc 🗸 🗸	16:9 🗸 📕		47	78.30 MB/23.28 GB					

Upon loading, Leawo UHD Creator will automatically convert photos into photo slideshow. After loading photos, you then could play back generated photo slideshow, view the details of generated photo slideshow, rename generated photo slideshow, click the edit icon to edit generated photo slideshow, etc.

**Note**: To burn photos to 4K Blu-ray, at the bottom left corner, click the first drop-down button and then choose one from BD-25 3840X2160, BD-50 3840X2160, BD-66 3840X2160 and BD-100 3840X2160 option according to the 4K Blu-ray disc type you want to create. And then set the "Fit to disc" and aspect ratio here. You could view required space at the bottom as well.

## Step 2: Add disc menu (optional)

Similar to burning videos to 4K Blu-ray, it's also possible and optional for adding disc menu in photo to 4K Blu-ray burning. The operation is exactly the same as that of adding disc menu for video to 4K Blu-ray burning. Please refer to that part for detailed operation.

## Step 3: Edit generated photo slideshow

You could edit video and audio of generated photo slideshow video by clicking the edit icon (  ${m \textcircled{B}}$ 

or O) right in every loaded video title.

#### Video editing

On the "Video" editing panel, you could insert/remove photos, drag photos for order adjusting, set the output video effect including photo duration, transition duration and transition effect, etc.

## Audio editing

On the "Audio" tab, you could click the "Add Music" button to add background music for generated photo slideshow video, and then set the background music effect like fade in, fade out and loop play, as well as add more background music or delete loaded music. In the end, click "OK" button to save and quit the editing panel.

#### Step 4: More photo to 4K Blu-ray burning settings

Now, click the green "Burn" button to call out the burning settings panel, where you need to complete settings including:

- Burn to: Decide what 4K Blu-ray file type you want to create, Folder, ISO Image File, and/or 4K Blu-ray disc. This setting allows multiple choices. If you want to create 4K Blu-ray disc, make sure you have inserted a writable 4K Blu-ray disc into the UHD drive that's connected to your computer.
- **Disc Label**: Give the output 4K Blu-ray file a name.
- Save to: Set a hard drive to handle the 4K Blu-ray burning and save the output 4K Blu-ray photo slideshow. Make sure you have chosen a hard drive that has enough space. You could view required space here.

Right next to the folder icon  $\textcircled$ , you could see a clickable drop-down button, which lets you decide how many 4K Blu-ray disc copies you want to create. This is available only when you have chosen to create 4K Blu-ray disc option under the "Burn to" section.

## Step 5: Start burning photos to 4K Blu-ray
