1 Introduction to Leawo Video Converter Ultimate

Leawo Video Converter Ultimate provides comprehensive solutions for you to convert video/audio file, rip Blu-ray/DVD, create photo slideshow video, burn video file/photo to Blu-ray/DVD, and play and download online video file. In other words, Leawo Video Converter Ultimate is a program suite that combines three different modules into one program: Convert module, Burn module, and Download module. The program allows you to convert video and audio files between 180+ formats, to achieve format conversion between Blu-ray/DVD and video format, to extract only audio content from source Blu-ray/DVD file, and to download video file from various online-video sharing sites like YouTube. With the program, you can also edit video files, add 3D video effect, select subtitles and audio tracks, set video and audio parameters, etc. Download and install Leawo Video Converter Ultimate, and then kick it off to enter the main interface as shown below.

1.1 Limitations of Trial Version & Method of Getting Registered Version

The trial version of Leawo Video Converter Ultimate allows you to have a free trial before you purchase the registered version. It should be noted that the trial version is limited in features and functions. Here limitations of trial version are presented together with the method of getting the

registered version.

1.1.1 Limitations of Trial Version

- A. Convert: The trial version allows you to convert only the first five-minute audio/video/Blu-ray/DVD content.
- B. Burn: The trial version allows you to burn only the first five-minute video content to Blu-ray/DVD file.
- C. Download: The trial version allows you to download up to five online video files.

1.1.2 Method of Getting Registered Version

To enjoy the unlimited features of Leawo Video Converter Ultimate, you need to purchase a registration code for getting the registered version. Click the key icon  at the top right to enter the activation center, where you need to click “purchase” button  to get the registration code. After receiving registration code, you are required to enter the code into the box and click  to activate the related functions.

1.2 Home Page Settings

1.2.1 Feedback

Click  button to send your precious feedback to Leawo Software for improving the program.

1.2.2 Settings

Click the gear icon  to pop up detailed settings panel.

1.2.2.1 General Settings

Under "General" button, you can freely choose a language for the UI from 11 preset languages: English, German, Japanese, Simplified Chinese, Russian, Hungarian, Armenian, Spanish, French, Portuguese and Dutch.

1.2.2.2 Conversion Settings

Under “Conversion” button, you can choose whether or not to prioritize native codec, to enable streaming MP4 video, and to enable DVD navigator, and at the same time, you can set the maximum tasks for running.

1.2.2.3 Burn Settings

Under “Burn” button, you can choose the burning engine and default DVD video mode.

1.2.2.4 Downloader Settings

Under “Downloader” button, you are allowed to set maximum download tasks, directory for saving downloaded video files, home page, whether or not to show the home page upon launching the downloader, and whether or not to delete browsing history on exit.

1.2.2.5 Performance Settings

Under “Performance” button, you can freely set CPU core.

1.2.2.6 Connection Settings

Under “Connection” button, you are allowed to set internet proxy in detail, and to set the frequency of automatically checking program update.

1.2.2.7 Others Settings

Under “Others” button, you can set the location of external subtitle, default encoding, screenshot image format, and the output directory for saving screenshot images.

1.2.3 Help Center

Click the question mark  to enter the Help Center, on which you can visit the product

page of Leawo Video Converter Ultimate by clicking “Home” ,

learn how to properly use Leawo Video Converter Ultimate by clicking “Tutorial” ,

report problems you encountered during the usage of Leawo Video Converter Ultimate by clicking “Bug Report”

 , click  to check program update, click  and  to

purchase and register the program, click  to write user review of the program, click

 to get support from Leawo Software team, and click  to check the version number of Leawo Video Converter Ultimate and other information.

1.2.4 Program Window Size Adjustment

Click  to minimize the program window; click  to maximum the size of the program window; click  to close the program window.

2 Convert Blu-ray/DVD/Video/Audio

Kick off Leawo Video Converter Ultimate to enter the home page, where you need to click “Convert” button on the sub-menu to enter the converting interface.

2.1 Step 1. Import Source Files into Program

On the converting interface, click “Add Video” button to import source video or audio file, or click “Add Blu-ray/DVD” to import Blu-ray/DVD disc, folder, or ISO image file. Alternatively, you can directly drag and drop source Blu-ray/DVD/Video/Audio file into the converting panel. Once source files are imported, you can preview source files via the inbuilt media player, select subtitles and audio tracks, edit source files, etc.

If you import source Blu-ray/DVD content, you will be provided three options for you to select: Full Movie, Main Movie and Custom Mode. Full Movie allows you to import all titles, and Main Movie only imports the longest title by default while you can freely choose titles for importing under Custom Mode.

2.2 Step 2. Choose Output Profile

There is a drop-down box named “MP4 Video” by default next to “Add Photo” button. Click the box to pop up a small panel, where you need to click “Change”

to enter the “Profile” panel. You can choose either video/audio format or mobile device as output profile under “Format” or “Device” group. Various video/audio formats and device models are available for selection, like 4K MP4, 4K MKV, HD MP4, HD AVI, MOV, iPhone 6s, iPad Air, etc. You can also make good use of the quick searching box on the left to fast locate your desired profile.

2.3 Step 3. Set Video and Audio Parameters (Optional)

Leawo Video Converter Ultimate allows you to change the video and audio parameters of selected profile like Video Codec, Bit Rate, Resolution, Frame Rate, Aspect Ratio, Audio Codec, Channel, Sample Rate, etc. You could enter the Profile Settings panel by clicking the same drop-down box and then clicking “Edit” option instead of “Change” option

. After setting parameters, you could click “Save to Custom”

option  to add customized profile to “Custom” group.

2.4 Step 4. Set Output Directory

After profile settings, you will be returned to the converting panel, on which you need to click the green “Convert” button to set output directory for saving the output files. Once

 is clicked, a small side bar will pop up, and you need to set a directory under “Save to” box for containing the output files.

2.5 Step 5. Start Conversion Process

Click the “Convert” button at the bottom of sidebar to start conversion process. During the conversion process, you could click “Cancel” button to call off the process.

3 Burn Blu-ray/DVD

Click “Burn” button on the sub-menu of Leawo Video Converter Ultimate to enter the burning interface.

3.1 Section 1. Burn Video to Blu-ray/DVD

3.1.1 Step 1. Import Source Video Files

Click the “Add Video” button to load source video files, or directly drag and drop source video files into the program. You could also import video folders. After importing, set the target disc type, quality and aspect ratio at the bottom.

3.1.2 Step 2. Set Disc Menu

On the right sidebar, select a disc menu (select "No Menu" if you prefer no menu for burning). The program offers built-in menu templates and online menu templates. You could select from "Built-in" templates or download more templates from "Online" menu center. By clicking the middle of the selected disc menu, you could get an instant preview.

3.1.3 Step 3. Customize Disc Menu

Leawo Video Converter Ultimate allows you to customize disc menu. You could click the pencil icon  on the disc menu previewing panel to enter the disc menu editing window, on which you could rename titles, adjust title position, change text font, size and color, add background music, apply background image/video, etc. The editing work could be done on both main menu and chapter list panel. Save the customized disc menu by clicking the blue "Save Template" button .

3.1.4 Step 4. Start Burning

Click the green "Burn" button  to pop up a sidebar where you need to set "Burn to", "Disc Label" and "Save to" options, and then click the "Burn" button  at the bottom to start burning video files to Blu-ray/DVD content.

3.2 Section 2. Burn ISO to DVD/Blu-ray Disc

Leawo Video Converter Ultimate even allows you to directly back up ISO file onto Blu-ray/DVD disc in one click.

3.2.1 Step 1. Import ISO File

Click "Add Video" button and then select "Add iso file" option to browse and choose source ISO image file for importing. Alternatively, you could directly drag and drop ISO image file into this Burn module for burning to disc.

3.2.2 Step 2. Start to Burn ISO to Disc

Once ISO image file is imported, an “Add iso file” window will pop up immediately. On the popup window, you need to set “Copy to” and “Disc Label” options. After that, click the "Burn" button to start burning ISO file to Blu-ray/DVD disc. Please note that a blank and writable disc should be inserted into your BD/DVD drive beforehand.

4 Download Online Video File

Switch to downloading interface by clicking “Download” button on the sub-menu to get ready for the online video downloading process.

4.1 Step 1. Locate Target Video

As the default home page for downloading interface is YouTube.com, if you do not change the default setting, you will be led to the official page of YouTube. You can either input the URL of target video file into the address box or search your target video file by inputting keywords into the searching box in order to locate target video.

4.2 Step 2. Choose Video for Downloading

After finding the target video, play it via the internal video player, and the program would detect the video being played and therefore display many downloading options of target video at different resolution for you to choose from. Select at least one of them and click the download icon to start downloading.

4.3 Step 3. View Downloading Process

You can view the video downloading process by clicking "Downloading" button next to the address box.

4.4 Step 4. Manage Downloaded Video Files

Under the "Downloaded" tab, you could view all downloaded video files. Right click a downloaded video file, and then you could add the video file to "Convert" or "Burn" module for converting or burning. Also, you could delete, play back and open file location if you like.

5 Edit Video

Under both "Convert" module and "Burn" module, Leawo Video Converter Ultimate allows you to edit source media files by trimming, cropping, watermarking, adjusting video effects and applying 3D effect. Add source media files, right click a loaded media file and select "Edit"

option, or click the "Edit" icon  at the end of a file, to enter the video editing panel.

5.1 Trim Video Length

Under "Trim" section, you can directly drag the slide bar to trim video length, or manually input values in "Start Time" and "End Time" box. The clip length can be viewed instantly. Reset it or click "OK" to confirm it.

5.2 Add Video Watermark

Switch to “Watermark” section, enable the Watermark button to green, and then you are allowed to add either Text or Image as video watermark. Watermark Transparency, Left Margin, Top Margin, Image Size are adjustable. Check "Apply to all" to add watermark to all videos. Press "OK" to confirm it.

5.3 Crop Video Size

Under “Crop” button, directly drag the dot frame to crop video, or select Letter/Pan/Custom/Full/16:9/4:3 in "Zoom", and adjust values in "Left"/"Top"/"Size" to get your desired video size. Press "OK" to confirm it.

5.4 Adjust Video Effect

Go to “Effect” section, directly drag the slides of "Brightness", "Contrast", "Saturation", and "VolumeZoom(%)" for special video effect. Check "Apply to all" to apply the effect settings to any of your loaded files. Press "OK" to confirm it.

5.5 Convert 2D to 3D

On the video editing panel, open the "3D" tab and then slide the "3D Mode" to green. You could then choose a 3D effect to apply to the final video file. There are in total 6 different 3D movie effects available for you to choose from: Red/Cyan, Red/Green, Red/Blue, Blue/Yellow, Interleaved, and Side by Side. Select one according to the 3D glasses you are using to enjoy 3D videos. For more vivid 3D effect, you could even directly drag the slide or set values in 3D Depth to adjust 3D depth. Tick "Apply to all" to apply selected 3D movie effect to all video files.

6 Create Photo Slideshow

6.1 Section 1. Photo Slideshow Maker

6.1.1 Step 1. Add Source Photos

Click the “Convert” module and then click the “Add Photo” button to browse and add photos you want to turn into slideshow into this photo slideshow maker. Selected photos would be automatically generated into a photo slideshow upon loading. You could click the thumbnail icon to play back generated photo slideshow.

6.1.2 Step 2. Choose Output Format

Open the drop-down box right before the big green "Convert" button and then click the "Change" button to enter the "Profile" panel, where you could select a proper profile as output format. You could select from "Format" and "Device" groups, or make use of the profile search bar to search desired profile quickly.

6.1.3. Step 3. Set Video and Audio Parameters

On the same drop-down box, instead of clicking "Change" option, by clicking the "Edit" option, you could enter the "Profile Settings" interface to adjust video and audio parameters of selected output profile, including: Video Codec, Quality, Video Size, Bit Rate, Frame Rate, Aspect Ratio as well as Audio Codec, Quality, Bit Rate, Sample Rate, Channels, etc.

6.1.4 Step 4. Output Photo Slideshow

Click on the big green "Convert" button on main interface to pop up a sidebar. On the popup sidebar, set a directory to save the output photo slideshow files in the "Save to" box.

Then click the bottom "Convert" button on the sidebar to start to convert generated photo slideshow to desired format.

6.2 Section 2. Photo Slideshow Burner

6.2.1 Step 1. Import Source Photos

Open the "Burn" module and then click the "Add Photo" button to browse and add photos you want to turn into slideshow and burn to Blu-ray/DVD. Selected photos would be automatically generated into a photo slideshow upon loading. You could click the thumbnail icon to play back generated photo slideshow. Set output disc type, quality and aspect ratio at the bottom.

6.2.2 Step 2. Set Disc Menu

Select a disc menu template from the right sidebar and preview it by clicking the middle of selected disc menu.

You could design disc menu by clicking the pencil icon on the preview panel. You could add personal image, video and music as background, reposition titles, change title content, adjust text color, size, font, etc. After designing, click the “Save” button to save designed menu into Custom group.

6.2.3 Step 3. Start Burning Photo Slideshow to Blu-ray/DVD

Click the green “Burn” button  to pop up a sidebar. On the popup sidebar, set “Burn to”, “Disc Label” and “Save to” options. After doing these, click the bottom “Burn”

button  to start burning generated photo slideshows to Blu-ray/DVD.

6.3 Section 3. Edit Photo Slideshow

You could edit generated photo slideshows no matter you want to convert them to other formats or burn to Blu-ray/DVD. Click the “Edit” icon in generated slideshow title, or right click generated slideshow and then select “Edit” option to enter the photo slideshow editing panel for video and audio editing.

6.3.1 Step 1. Edit Photo Slideshow Video

Open the “Video” panel on the editing panel. You could adjust photo position via drag-and-drop, add extra photos into slideshow from your computer, set photo duration, transition duration and transition effect, etc. You can get instant preview via the built-in player.

6.3.2 Step 2. Edit Photo Slideshow Audio

Open the “Audio” panel on the editing panel. You could click the “Add Music” button or directly drag music from your computer into generated photo slideshow.

You could drag one or several songs as background music, change music position and adjust output audio effect.
