Brief Introduction

CleverGet Streaming Video Recorder is a professional streaming video recorder that could help you record online videos from almost all video sites like YouTube, Facebook, Instagram, Twitter, Vimeo, Dailymotion, Twitch, Veoh, Metacafe, LiveLeak, Vevo, TikTok, Instagram, etc., and even streaming services like Amazon, Netflix, Max, Disney+, Discovery+, etc. It could record and save online videos without quality loss at up to 5X speed, with selected audio track, for unlimited offline watching.
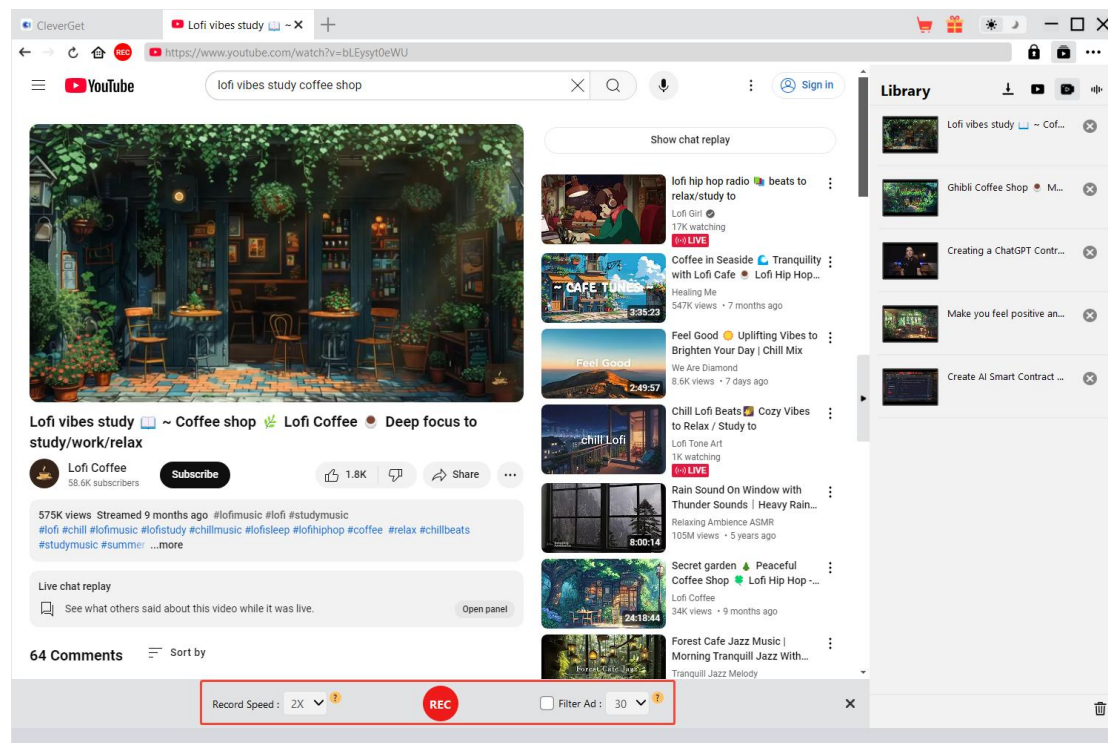

Main features of CleverGet Streaming Video Recorder:
1. Record and save online videos in original quality, or at up to 4K/2K/1080/720P resolution and 60fps.
2. Record and save online videos at up to 1X, 2X, 3X, 4X or 5X recording speed.
3. Record and save online videos to MP4/MKV files for various media players and devices.
4. Apply ad filter to record online videos with ads skipped from most streaming platforms.
5. Record video with original or desired audio sample rate and audio channel,
6. Record online videos with selected audio track.
7. Stop and save recording anytime, and then restart recording at will.
8. Built-in browser to play, watch and record online videos directly.

How to Purchase and Register CleverGet Streaming Video Recorder

1. Free Trial Version vs. Registered Version vs. Expired Version

There are in total 3 different versions of CleverGet Streaming Video Recorder: Free trial, registered and expired.

Status	Recording length	Watermark
Free trial version	3 minutes	No
Registered version	No limit	No
Expired version	3 minutes	No

CleverGet Streaming Video Recorder free trial version and expired version allow you to record videos for totally free, but you could only record up to 3 minutes of target video in each recording. Once your recording reaches the limitation of 3 minutes, CleverGet Streaming Video Recorder will automatically stop recording and save recordings to your computer. To unlock the recording length limitation, you need to register and activate CleverGet Streaming Video Recorder with a valid license.

2. How to Purchase CleverGet Streaming Video Recorder License

There are 2 types of licenses currently: 1-year license and lifetime license. They differ from each other only in the validation period. Either type of license could be purchased from CleverGet website and CleverGet software program.

A. Purchase license from CleverGet website:
    1. Open CleverGet Streaming Video Recorder product page and click the "Buy Now" button to reach the purchase page. Choose license type and then proceed to complete the purchase details and payment. The purchase details and license code will be emailed to you instantly after you complete payment.
    2. Or, directly open purchase page of CleverGet and then select CleverGet Streaming Video Recorder module and validation before you click "Check Out Now" button to proceed and complete the payment.
B. Purchase license from CleverGet program interface:
    3. Kick off CleverGet program, and then directly click the red "Buy Now" shopping cart icon

, or click the three-dot icon *** to choose the "Buy Now" option on the drop-down menu, to get to the purchase page of CleverGet. Choose the module(s) and validation, and then proceed to complete the purchase as mentioned above.

4. Or, click the "Activate" button 🔒 on CleverGet program to enter "Activation Center". Choose the module you want to purchase and then click "Buy Now" button. On the popup purchase page, choose the right module and validation and then complete the payment.

5. Or, if you have already purchased and activated CleverGet Streaming Video Recorder, on the "Registration Center" interface, you could see "Renew" button right next to Video Recorder module, by clicking which you could purchase a renewal license code to renew the usage.

Note: You could purchase license of any other modules of CleverGet in the ways mentioned above. The more modules you purchase, the higher discount you get.

3. How to Activate CleverGet Streaming Video Recorder

Once you have Video Recorder license in hand, you could download and install CleverGet (Video Recorder is a module built in CleverGet) on your computer first, and then try to register and activate CleverGt Video Recorder. Follow the below guide for registering and activating:

A. On CleverGet program, click the "Activate" button 🔒 to enter "Activation Center". Copy and paste the registration code into the code box. Press "Enter" key on keyboard or

click ➔ button to activate.
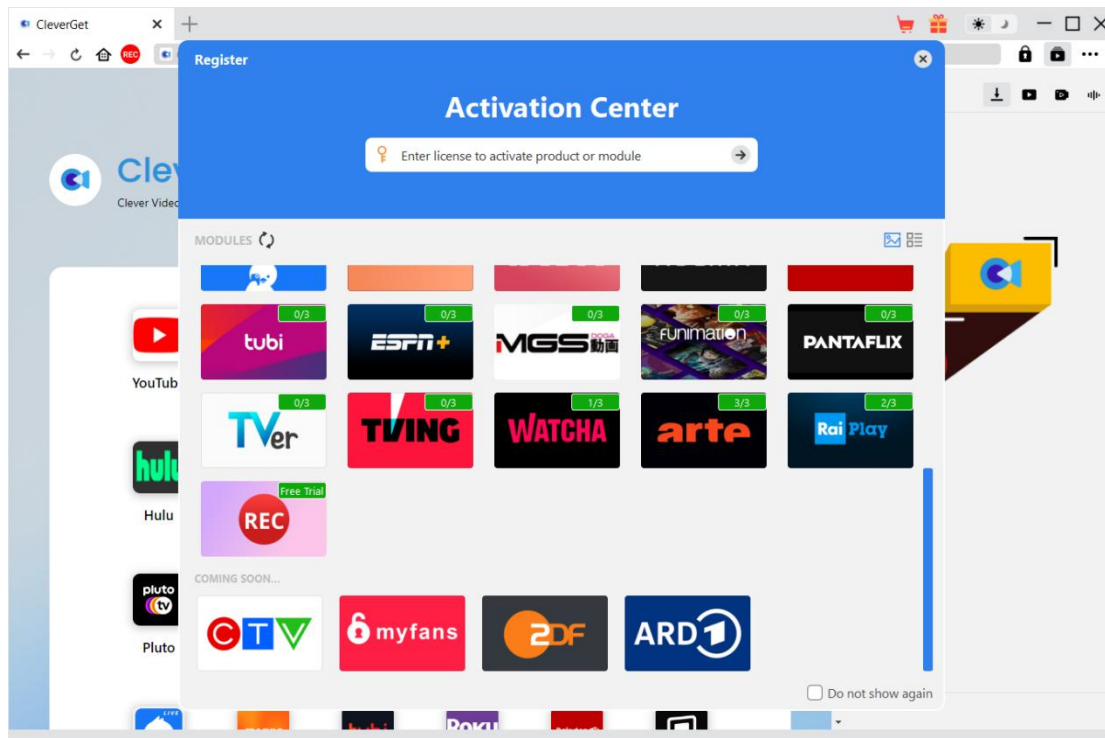

B. Or, on CleverGet program, click the three-dot icon ••• and then click the "Register" option to enter "Activation Center" for activating CleverGet Streaming Video Recorder with

valid registration code you've already purchased.
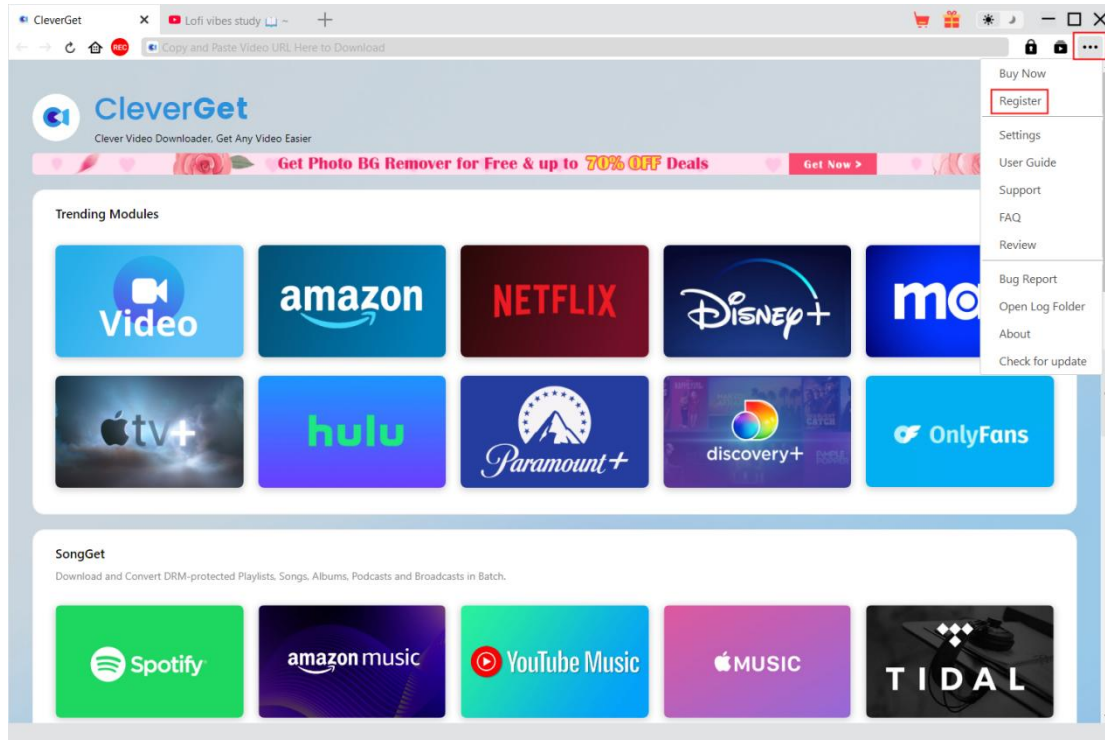

Note: Internet connection is required for activating CleverGet Streaming Video Recorder and other CleverGet modules.

How to Record Online Videos?

CleverGet Streaming Video Recorder helps you record online videos to MP4/MKV files in original or 4K/2K/1080P/720P quality from 1000+ video sharing sites for unlimited offline watching at up to 5X recording speed. The below steps show how to record online videos with CleverGet Streaming Video Recorder.
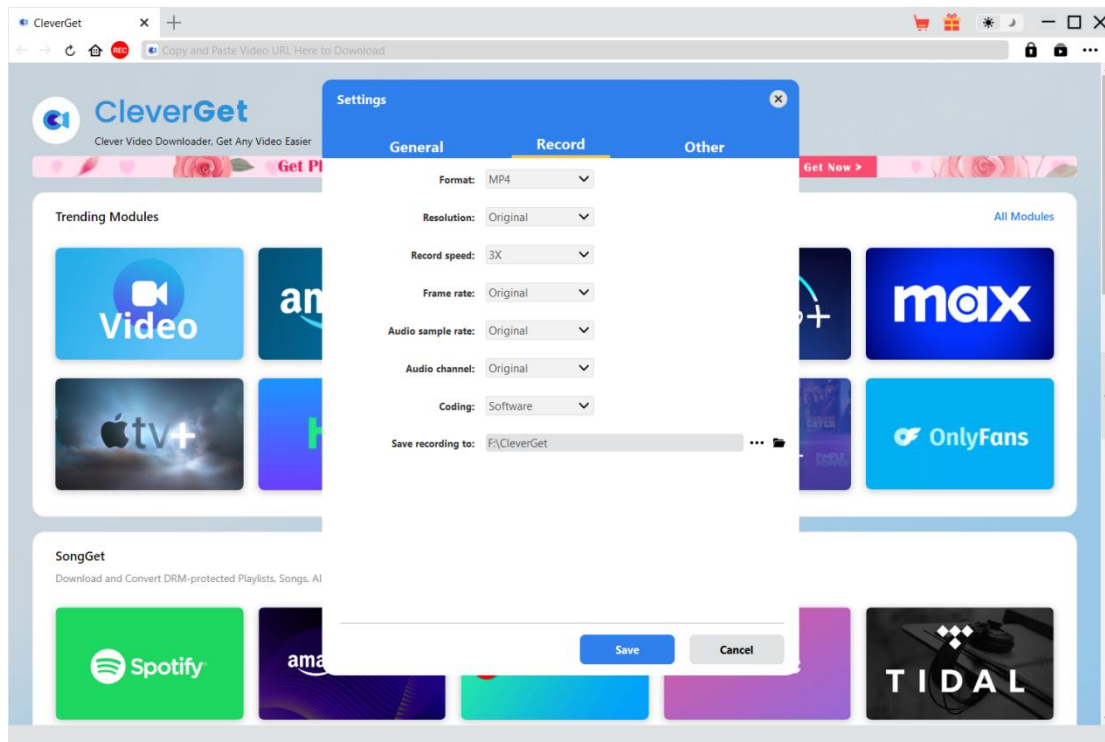

Step 1: Download and Install CleverGet
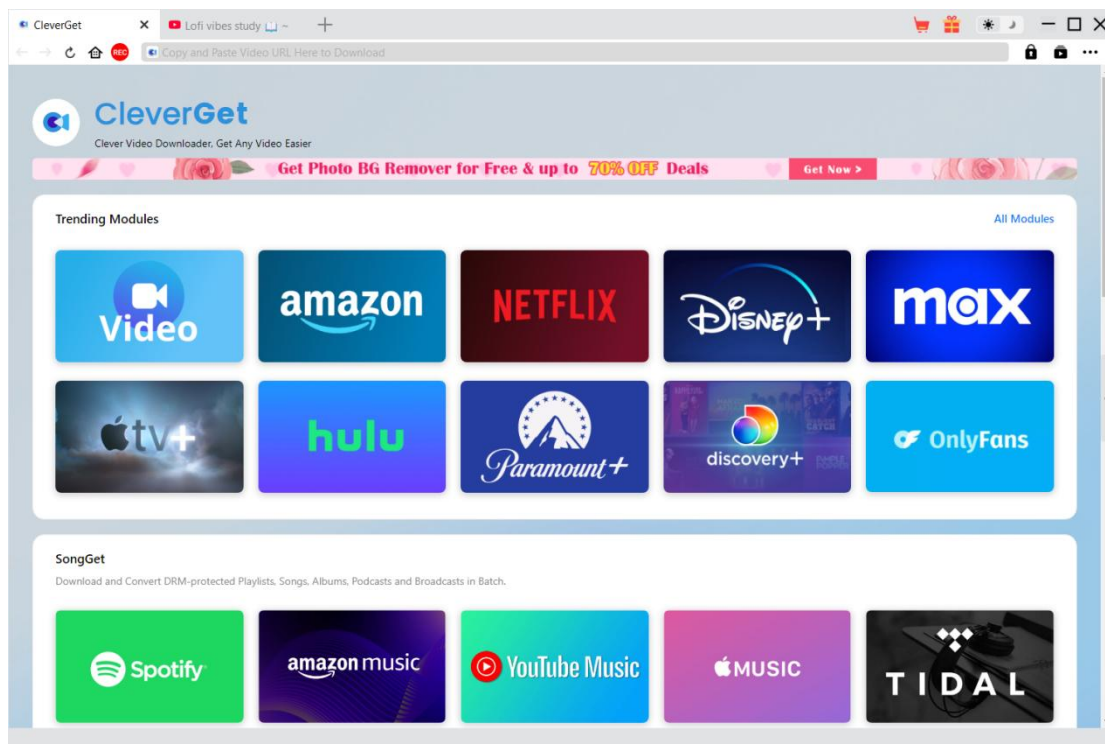

Firstly, free download and install CleverGet on your computer. You could either visit CleverGet website, or open your email that has download link and purchase details to download and install CleverGet.

Note: CleverGet Streaming Video Recorder is an internal module of CleverGet.

Step 2: Configure Recording Settings

Kick off CleverGet on your computer. Click the More option (in 3-dot icon •••) at the top-right corner and then choose "Settings" option on the drop-down menu. On the newly pop-up Settings panel, open the "Record" tab to complete recording settings, including: "Format", "Resolution", "Record speed", "Frame rate", "Audio sample rate", "Audio channel", "Coding", and "Save recording to" options. Click "Save" button to save all settings and quit the Settings panel.

Step 3: Play Back Target Video
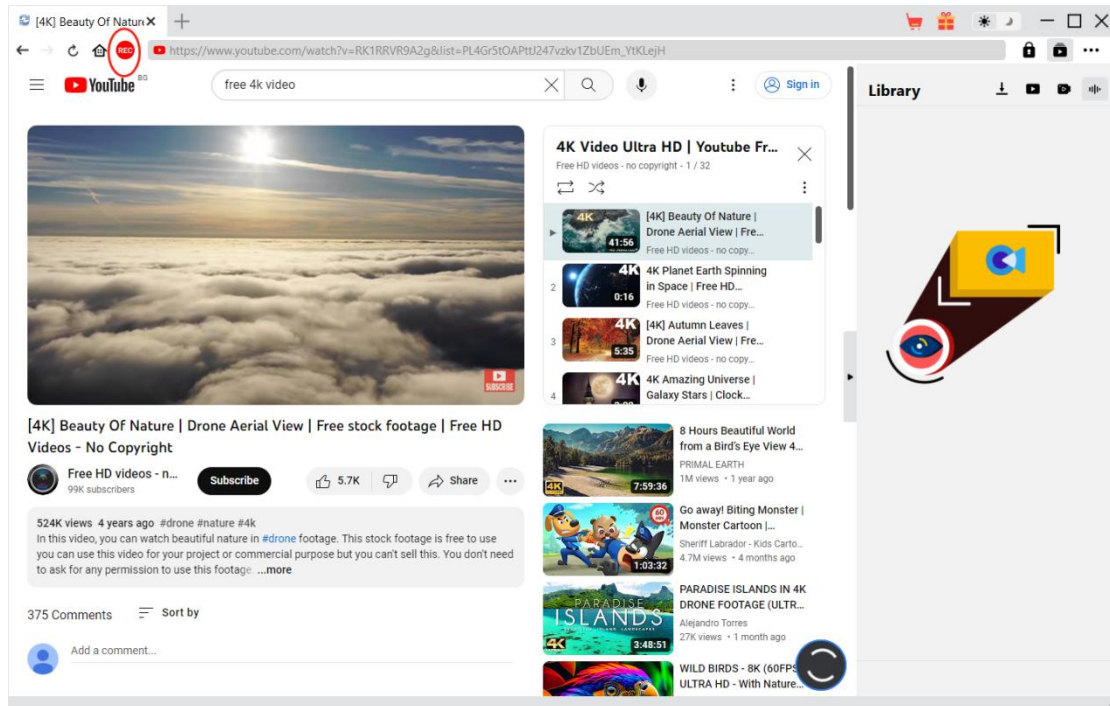

Open the target video you want to record within CleverGet and play it back. You could see a red

REC icon right next to the Home icon on the address bar, by clicking which you could call

out the "Recording" toolbar at the bottom.

Step 4: Set More Before Recording
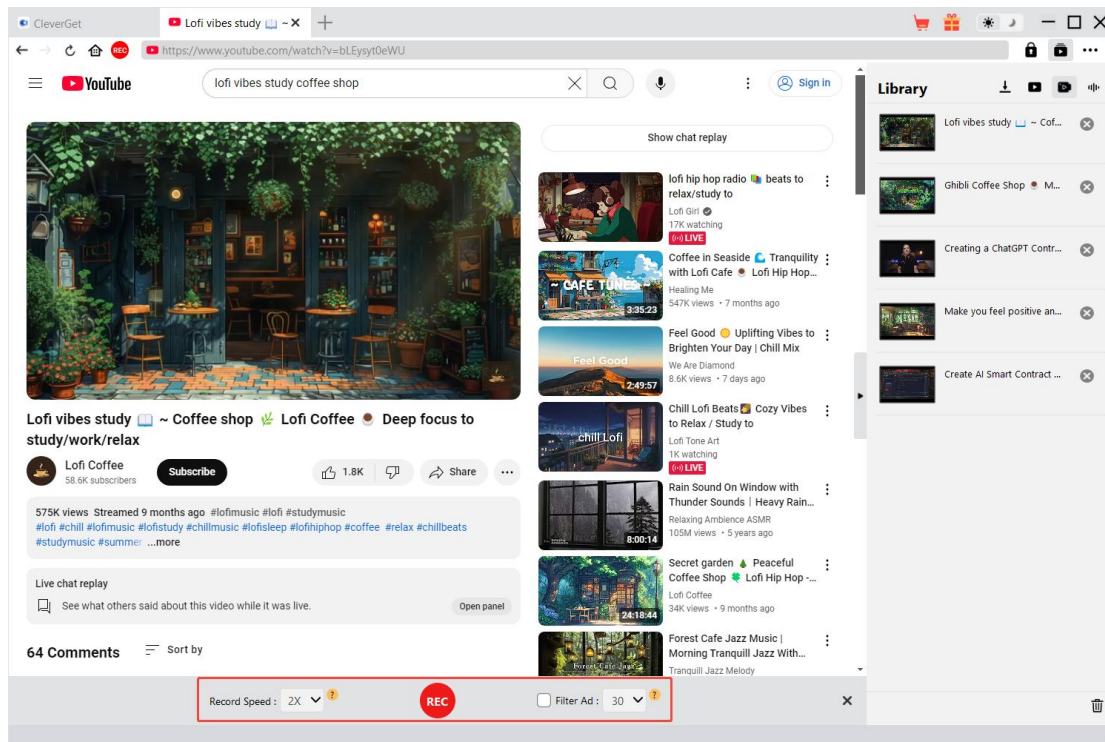

Now, you need to complete more settings before recording, including: select audio track (if available) from target video, and set recording speed and ad filter on the pop-up recording toolbar at the bottom.

Note:

1.   You could change "Recording Speed" anytime during recording. Recording Speed change will take effect instantly.

2.   You could check/uncheck "Filter Ad" option and change ad filter length anytime. Change will take effect since the next ad playback.

3.   The higher recording speed you set, the bigger odd target video playback will become choppy. Choppy video playback doesn't affect the final recording result.

4.   For stable recording quality, please don't set the video playback quality as "Auto". Set a specific video playback quality if available.

5.   The "Filter Ad" feature is a beta feature, which might not apply to certain streaming services. If it is not checked, CleverGet will record target video with ads.

Step 5: Start Recording
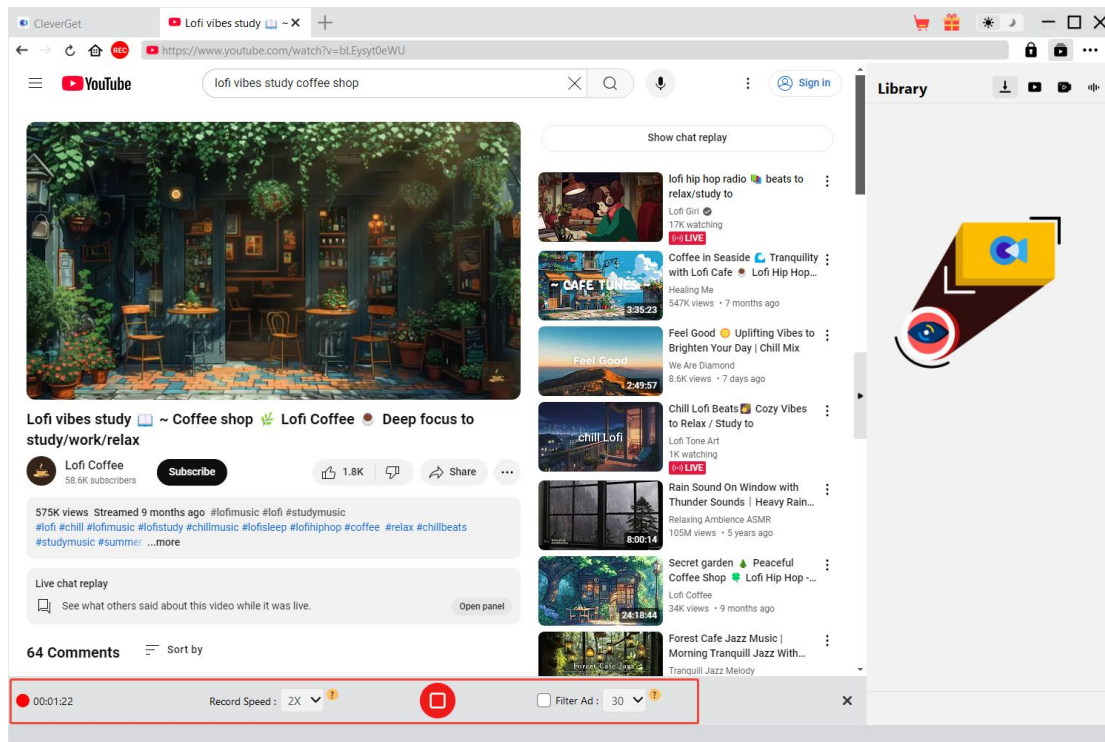

With all settings done, you could then click the red "REC" button on the recording toolbar to start recording online video. During recording, you could change "Recording Speed" and "Filter Ad" options during recording.

Step 6: Check Recordings
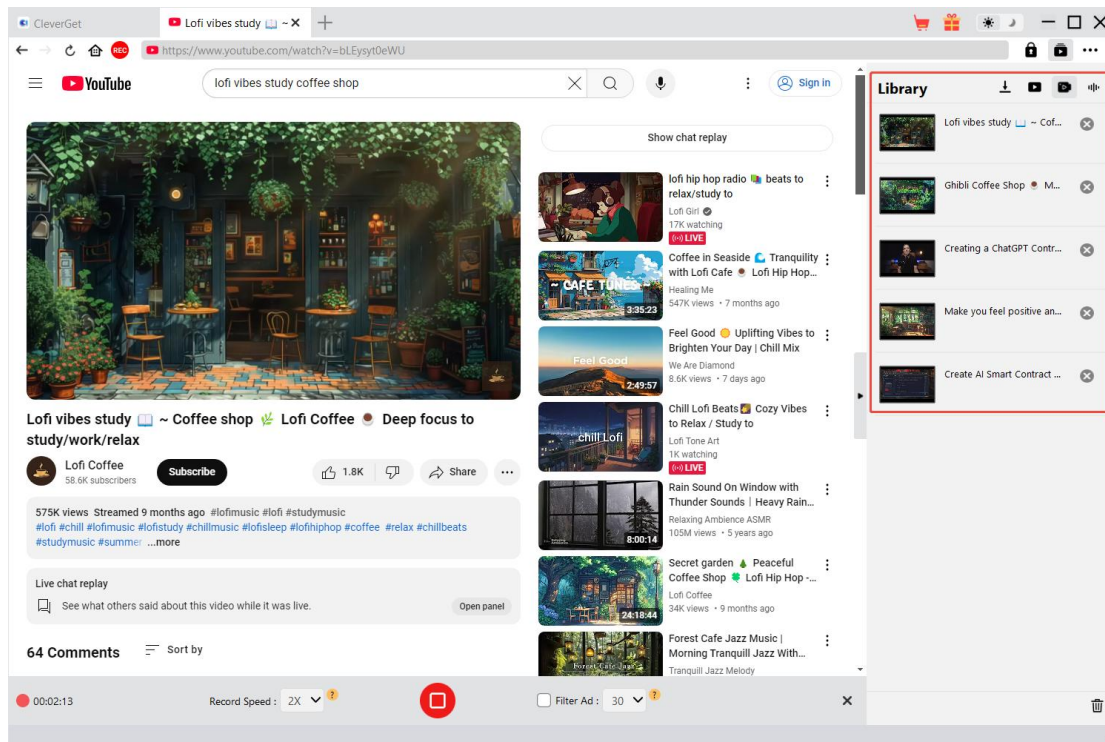

You could stop recording and then continue recording any time you like. CleverGet Streaming Video Recorder will generate a recording file every time you stop the recording. You could view the recordings on the right sidebar, which could be opened/hidden by clicking the "Library" icon

at the top-right corner. Then, you could view all recordings under the "Recordings" tab on the "Library" sidebar. Here, you could click "Play" button on the thumbnail of recording file to play it back with your default media player, open its file folder, play it with Leawo Blu-ray Player, burn to Blu-ray/DVD, delete it, or open web page of downloaded video.

How to Set CleverGet Streaming Video Recorder

On the top right corner of CleverGet, click the three-dot icon ••• and then you could see a drop-down menu, which includes multiple options: Buy Now, Register, Settings, User Guide, Support, FAQ, Review, Bug Report, About and Check for update. Click any option to get help you need.
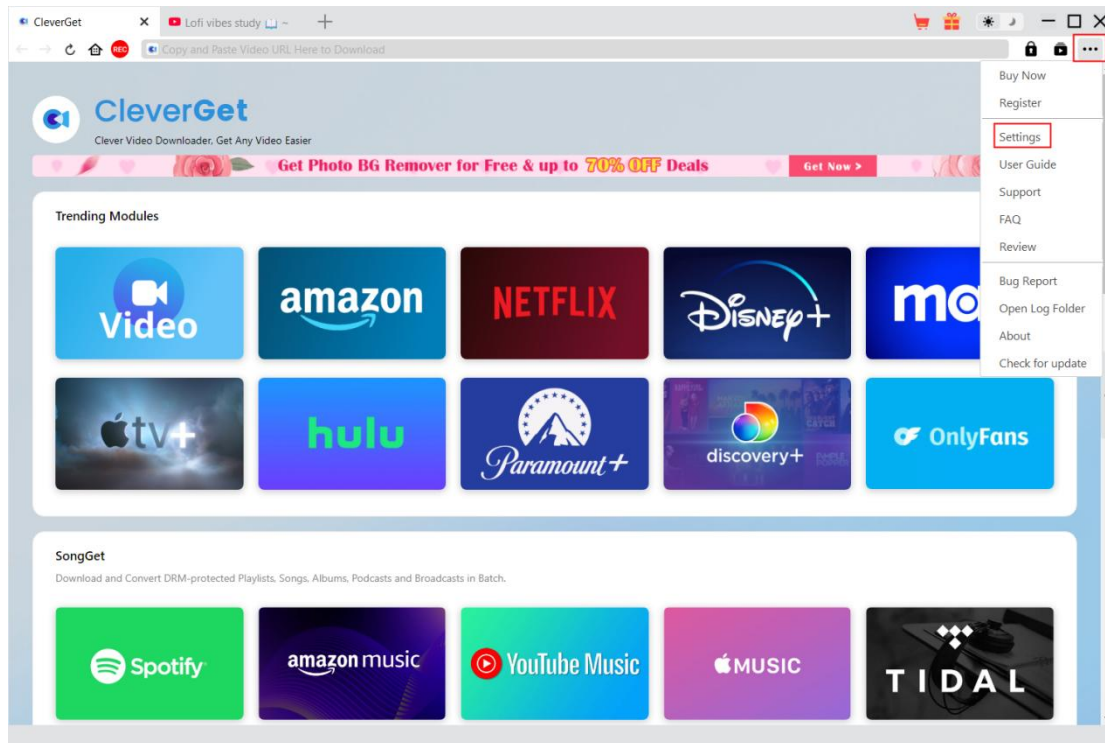

Also, CleverGet allows you to change default settings for better experience. Click the "Settings" option on the drop-down menu to enter "Settings" panel.

General Tab

On the "General" tab, you could set program UI language, appearance, max download tasks, download directories, etc. Check the details below:

1. **Language**: Choose a UI language from English, Chinese (Simplified), Japanese, German, Korean and French.
2. **Appearance**: Switch between light and dark modes. Or, change it directly by clicking "Light/Dark Mode" icon ☀ ☽ on the main interface.
3. **Max Download Tasks**: Decide how many tasks CleverGet could process at the same time, from 1 to 5.
4. **Save Video To**: View and set output directory for saving downloaded videos.
5. **Video Format**: Choose default video format for output from MP4 and MKV.
6. **Resolution**: Choose the default resolution for video download.

7. **Save Audio To**: View and set output directory for saving downloaded audio files.

8. **Create subfolder for each module**: Automatically create subfolders for all modules if checked. Save and classify downloaded videos to corresponding module's subfolders.

9. **Cache**: View program browser cache address, and clear cache in one click for quick issue fixing like program crash, program getting stuck, etc.

10. **Hardware accelerated coding**: Check this to use GPU graphics card for coding downloaded file, which is much faster but requires higher computer hardware configuration.

11. **New Tab**: Choose to open a new tab to home page, default page or blank page.

12. **Clear browsing history upon every exit**: Check to let clear browsing history every time CleverGet program quits.

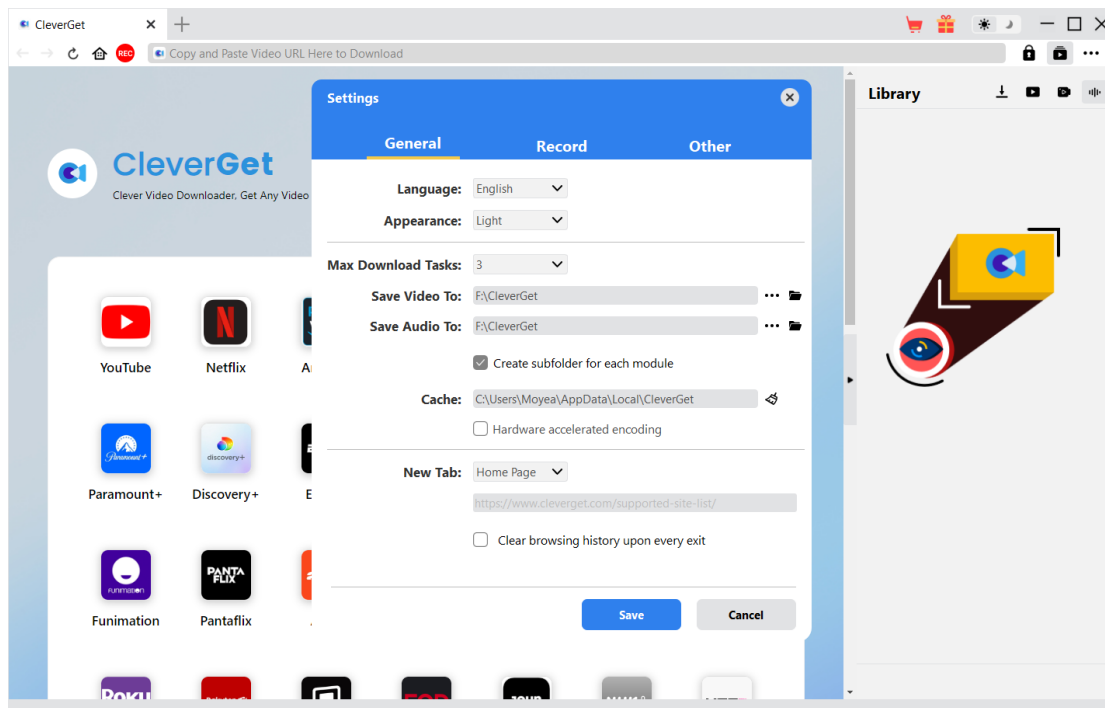

Record

On the "Record" panel, you could set recording format, resolution, countdown duration, coding type, recording directory, and decide to show Recording Settings window next time or not.

1. **Format**: Choose to save recordings to MP4 or MKV file.

2. **Resolution**: Set the recording resolution, up to 1080P available.

3. **Record speed**: Set the default record speed from 1X, 2X, 3X, 4X and 5X.

4. **Frame Rate**: Choose the default frame rate for recording online video. Original is recommended.

5. **Audio sample rate**: Choose the default audio sample rate for recording online video. Original is recommended.

6. **Audio channel**: Set the default audio channel for recording online video. Original is recommended.
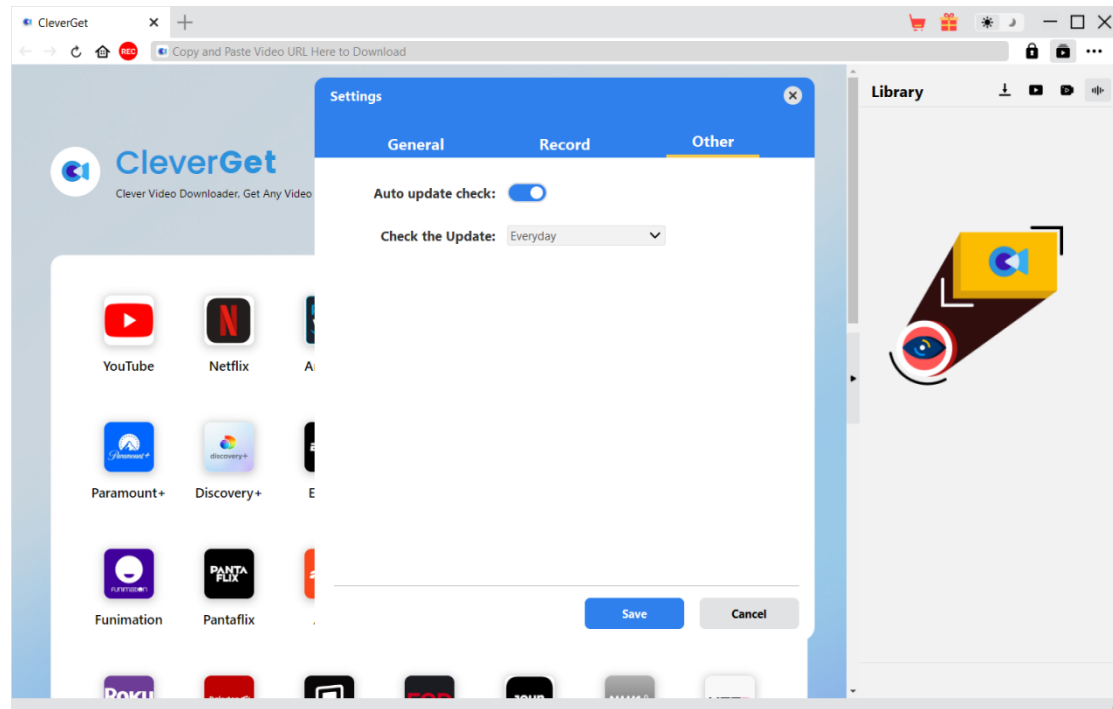

7. **Coding**: Choose to encode recordings through Software accelerated coding (CPU coding) or hardware accelerated coding (GPU coding, if available).
8. **Save recording to**: View and change recording save path.
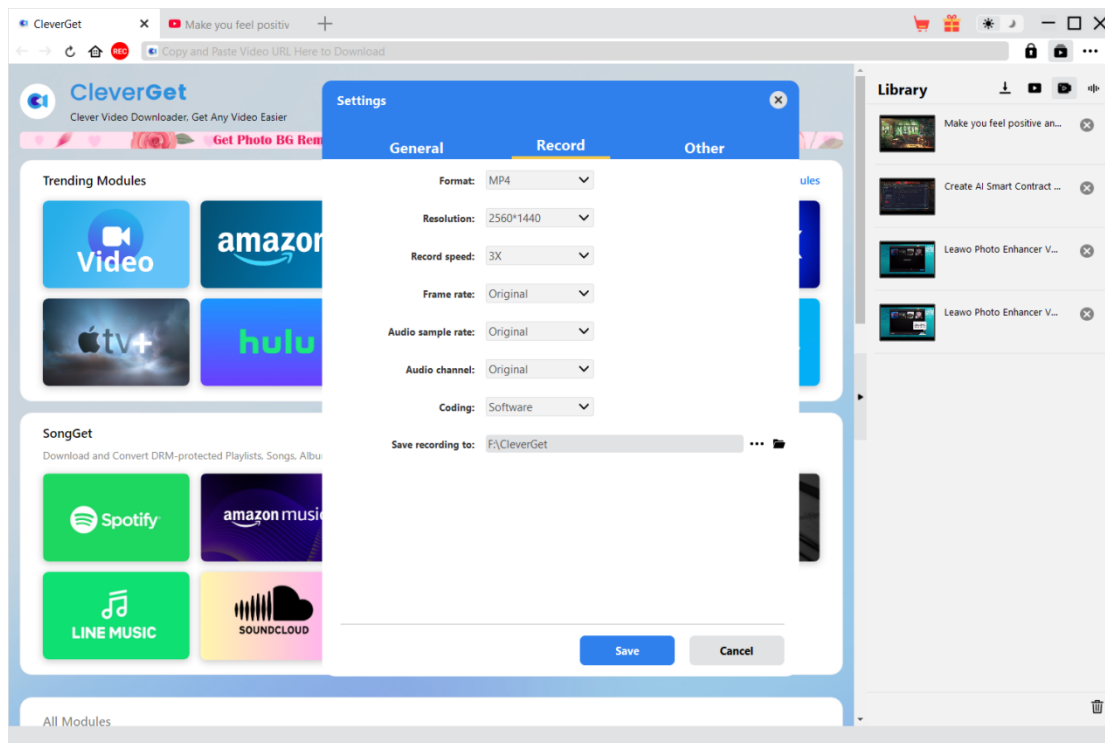

Other Tab

Open Other tab to enable/disable "Automatic Update" feature and set update check frequency on "Check the Update" drop-down panel.

After all settings are finished, remember to click "Save" button to save all changes.
